IRISH MUSSOLINI IS ASSASSINATED

KEVIN O'HIGGINS LEADER AND MINISTER OF JUSTICE

Killed On Way To Mass Sunday By Personal Enemies—Was unflinching As An Officer—Was Strong Man of the Free States—Forgives Killers With Last Breath—Brought Death On Himself By His Iron Nerve.

Kevin O'Higgins, known as "the strong man" of the Irish Free States was shot down in the streets of Dublin, Ireland, Sunday, and killed by assassins.

As in the case of another "strong man," Michael Collins, his murderers lay in wait for him and as he walked alone for his home to Black Rock, a short distance from Dublin, to mid-day mass, an automobile pulled up beside him and three men pumped bullets into him.

The assassins drove away and thus far have escaped police.

As he lay on the road mortally wounded, O'Higgins, vice president of the Free State council minister of justice and foreign affairs, gasped out: "I forgive them all."

Nothing could be done to staunch the flow of blood streaming from half a dozen wounds. Four bullets had pierced his neck, one his chest and another the base of his brain.

The sorely wounded man regained consciousness and to those about him said: "I am dying at peace with my enemies. I die for my country, I go to join Michael Collins."

Mr. O'Higgins usually was accompanied by a detective, but Sunday when starting for the Booterstown Catholic church for mass, he told his escort for the first time in three years to remain at home.

He was taken entirely by surprise when attacked.

The first shot struck him in the abdomen, but he managed to stagger across the road, where he collapsed. His assailants fired five or more other bullets into his head and body before springing into their car and driving furiously away.

The first to reach the wounded minister were Eamon Fleming, an official of the ministry of finance, his brother, and Professor John MacNeill, former minister of education.

Fleming raised his head, and Kevin whispered huskily: "They've got me, just as they got my father," and later "I forgive them. I die at peace with my enemies and my God."

Turning to Professor MacNeill, he said: "There is no hope. I want to dictate my will."

MacNeill knelt on the blood stained footpath and in a clear voice O'Higgins dictated his will, leaving everything he possessed to his wife and baby daughter.

The best surgeons in Dublin were summoned to his home, where he was taken, but they could do nothing to save his life. Despite his terrible wounds, his mind remained clear to

the end, and the doctors marveled at his vitality. He embraced his wife and child, and said farewell to scores of friends.

"Kevin, while there's life, there's hope," one of them said encouragingly.

"Ah! There is no hope," the minister declared in his old cynical manner. "But I was always a bit of a diehard."

Kevin O'Higgins was known as the Irish Mussolini because of the strong measures he adopted for suppressing the Republican attempt to smash the free state for force of arms.

He was probably the most respected and at the same time the most hated man in Ireland. A nephew of Governor Tim Healy, he shared the governor's gift of incisive and bitter speech.

A particularly touching coincidence is that his assassination follows upon the similar fate of his father, Dr. O'Higgins, who was shot dead by armed riders in his own home in 1923.

DESERVED PROMOTION.

John S. Morris, of East Franklin street, and in the employ of the Norfolk and Western railroad, has been made car foreman of the company at Winston-Salem, North Carolina, and will move, with his family to that city. While the many friends here of Mr. Morris and his family regret the fact that they are leaving Circleville, yet they are pleased to know that he has received the recognition he merits and their best wishes follow them in their new home.

WROTE BEST ESSAY

Miss Rose Gertrude Schmidt of Mountstown, N. J., whose essay entitled the "Meat Parade" won for her a university scholarship and \$150 in cash as national champion of the fourth national meat story contest which has just come to a close in high schools of the United States. Announcement of the winners was made by the National Live Stock and Meat Board, sponsor of the contest, after selections had been made by a committee of prominent home economics women. Nearly 14,000 girls competed in the contest.

EASTERN STAR PICNIC.

The O. E. S. will hold a picnic on Mrs. Patton's lawn July 12, between 6 and 7 o'clock. All Stars and their families are requested to attend and bring sandwiches sufficient for their own family and one buffet dish and also dishes and silver for each member of the family.

All-Powerful Custom

Custom is a powerful weapon of ridicule. A man who eats four meals a day has as much right to that number as the man who eats three—yet the world laughs at him.—Exchange.

Self-Denial

Teach self-denial, and make its practice pleasurable, and you create for the world a destiny more sublime than ever issued from the brain of the wildest dreamer.—Sir Walter Scott.

Keeping Up

It isn't the payments for upkeep that are the deterrents; it is keeping up the payments.—Wall Street Journal.

BIRTHS

To Mr. and Mrs. Merle Barnhart, South Court street, Monday, July 11, 1927, a son.

To Mr. and Mrs. James Thacher, of Columbus, at St. Ann's hospital, Friday, July 8, 1927, a daughter. Mr. Thacher is a son of Mrs. E. S. Thacher Sr.

Editors and Their Wives Call on the Coolidges

Several hundred members of the National Editorial Association and their wives, making a trip through the Black Hills, called on President and Mrs. Coolidge at the summer White House. The President is seen above chatting and shaking hands with his guests.

E. D. OVERLY KILLS SELF WITH SHOTGUN

Remains Found Near Home of Son at Bexley Friday--Burial at Kingston.

With his head nearly torn away, the body of Ervin D. Overly, aged 78, Grove avenue, Bexley, who ended his life by shooting himself with a shotgun, Friday, was found about 75 yards from his home Saturday morning.

The aged man, who threatened Friday afternoon to take his life, because he was despondent over things in general, had placed the shotgun so that the bullet penetrated his neck under his chin when he pulled the trigger.

When he failed to come home a search was made for him and his body was found in a wooded section not far from the family residence, where he made his home with his son Wood N. Overly. It is believed he had hidden away the shotgun in the vicinity where he committed the act, as it had been missing from the house for several days.

Mr. Overly, who was a retired plasterer and brick mason, had resided in Columbus for a number of years, but lived in Kingston and near that place prior to moving to Columbus. He was born near Kingston, the son of pioneer residents in that neighborhood. Overly Chapel, Ohio, was named for his grandfather.

Surviving him besides his son Wood with whom he resided, and who discovered his body Saturday morning, are his wife; three other sons, William, of Bidwell, Ohio, Charles D. of Cedarhurst and Otis Overly of Vinton, Ohio; four daughters, Mrs. Lydia Neal, of 2162 Margaret avenue, Shepherd, with whom the wife of the deceased resided, Mrs. Catherine Worthorn, of Wellston; Mrs. Laura Romer and Miss Bessie Overly of Columbus; two sisters and a number of grandchildren and great-grandchildren.

Funeral services at 9 o'clock Tuesday from Edward E. Fisher Co., chapel. Burial in Kingston.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices.

Marriage License

George H. Betts, 24, Williamsport, farmer, Frances Strope, 24, Atlanta. Rev. Franklin McElfresh.

KIRKWOOD REUNION

The fourth annual reunion of the descendants of George and Sallie Williams Kirkwood was held Sunday July 10, at Rising park, Lancaster. Twenty-nine members and friends of the family were present. Those attending from Circleville were Miss Anna Kirkwood, Mr. and Mrs. Charles B. Stoffer and son, Thomas Willard, Mr. and Mrs. Montford Kirkwood and children, Lucile and Montford Jr., Mr. and Mrs. Lowell Brown and children, Betty, Jack and Rosemary and Mr. and Mrs. Earl Huffer.

Wren's Sweet Song

While Jenny Wren is incubating, her mate perches nearby, untiringly warbling his sweet song, says Nature Magazine. After the young are hatched there is little rest for either of them. Caterpillars, beetles, bugs and spiders must be supplied in astonishing numbers all the time, until the youthful wrens are ready to help in the hunt.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Bucyrus—John E. Hopley, 77, formerly in the U. S. consular service and prominent in Ohio political circles a quarter century ago, died at his home Sunday. Funeral services Wednesday afternoon.

Hamilton—Cracked walls at the office of the Indiana Refining company branch here today gave evidence of the force of an explosion which robbers tried in vain to open a safe containing more than \$200. Neighbors who heard the traffic blast investigated but the bandits fled while the investigators dressed. Concrete two feet thick in which the safe was imbedded was blown away. Windows were shattered and frames loosened.

Toledo—The \$20,000 races, a trotting and a pacing event, were on this week's program for the initial meeting of the grand circuit harness racing season, opening today. The class 8 Page Dairy pace on Tuesday will carry prices of \$20,000 and the class 10 hotel trot on Thursday will be worth a like amount.

Cleveland—The hunt for Cleveland's "smoked" robber widened Monday to all of northern Ohio.

Oxford—Shortly after he arrived at his laboratory yesterday Dr. Bruce Fink, professor of botany at Miami university was found dead in his chair by his assistant. Physicians pronounced death due to heart disease.

Pomeroy—Altho slide rock still was falling today, W. McCrosia, city engineer, said he believed the landslide along the Ohio river between here and Middleport was ended. The slide started Friday and forced motorists to detour from state highway route No. 7, which was closed pending arrival today of state highway officials.

Raising a Doubt

Why are we always demanding that people get out of a rut they are in? When a locomotive jumps the track and kills a lot of people it gets out of its rut.—Atchison Globe.

Tip to Hosts

You can make any man feel at home by starting an argument.—Rutland Herald.

ASHLAND, KY. PEOPLE MEET WITH ACCIDENT

Sunday Afternoon at Crooked Bridge, Columbus Pike --Girl Injured.

Returning home from a visit to relatives at Marion Sunday afternoon Emery Smith, of Ashland, Kentucky, driving a Ford sedan, was side swiped on the Crooked bridge north of South Bloomfield by a Ford coupe bearing license No. 954539 going north. The two cars met on the bridge which as its name implies is in a crooked line of the road and crosses the Buleen ditch at this point.

The car of Mr. Smith turned over several times and it was a wonder no one in the car was killed as the top of the machine was crushed. With Mr. Smith were his wife, Orville Gard, a nephew and Emmadelle Berry, a niece. They were brought to this city and were taken to the home of Judge I. N. Abernethy, by Mr. and Mrs. L. F. BeVier, of Columbus, who came up just after the accident occurred. Miss Mary BeVier stopped her machine within a few feet of the two wrecked machines. She had her car under control or there would have been a third wreck to chronicle.

Mr. Smith received a severe shock. His wife was bruised considerably and their little niece sustained a colles fracture of her left wrist. Dr. Howard Jones attended to their injuries and they returned to their home in a bus. Their car was brought in by The Circleville Motors company.

Hoboes Fatten on Good Nature of Housewives

New Britain, Conn.—Any good hobo with a hard-luck story can make from \$12 to \$15 a day, in the opinion of Prof. W. B. Bailey, formerly of Yale, who lived the life of a tramp three summers and then for ten years conducted a hobo's lodging-house. "Thanks to the American housewife, the easiest thing a tramp does is to eat," he said in telling of his experiences at a Rotary club's dinner. "The only objection he has to the American housewife is that she insists on feeding him cake and pie when what he wants is a slice of meat between two pieces of bread."

Telephone's Beginning

In 1875 the first words were transmitted by telephone, but the first complete sentence was not transmitted until 1876.

CHURCH NICNIC.

More than seventy members and friends of the Church of the Brethren picnicked in May's woods last Saturday afternoon.

The principal thing on such occasions is the "eats," and that was good, better, best to the nth degree. But that was not all for the recreation feature was equally grand. Then came the musical program which made the stately old shade trees fairly clap their hands with joy in concert with the happy voices of childhood roseate youth and old age.

The cornet solos of Charles Essick, superintendent of the Sunday school and recreations and readings by others were highly complimented.

Some took pictures, others posed while the same or others took a hike, but all went merry as a marriage bell.

HIS BRITISH CROSS

This is the British Air Force cross which was presented to Colonel Lindbergh by King George in London.

SOCIAL CALENDAR

Mr. and Mrs. Frank Neff, of Pherston entertained to dinner Sunday. Covers were laid for Mr. and Mrs. O. P. Bentley, of this city, Mr. and Mrs. George Neff of Lancaster and Edgar Ebert of Columbus.

American Flag in England

In 1918 the United States flag was formally placed in St. Paul's cathedral in London, England. It was presented by a party of American soldiers serving in the Canadian army during the World war.

Black Flowers Unknown

There are no black flowers, but the ones nearest to black are very dark tulips which are called black. There are very dark pansies also that seem almost black.

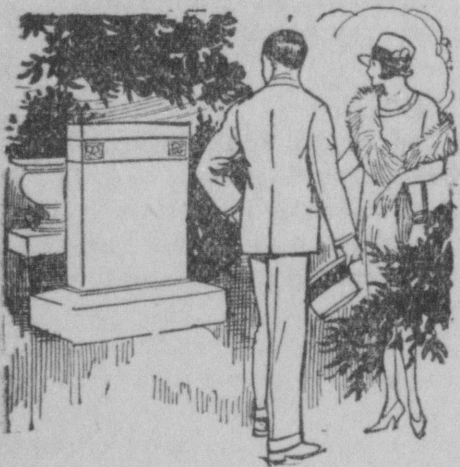

Classed Under Head of Expected Events

"What was coming off at yore house last night, Gap?" asked a resident of the Rumpus Ridge region.

"Nuth'n special," replied Gap Johnson. "That is, except I'd invited a passel of kinfolks over to sorter help me celebrate my birthday. Wife's maw was there and several of wife's brothers and sisters and their families and such like, and a bunch of my kin, and some of the neighbors, and a feller or two that figgered there mought be a little lickin' handy. Nuth'n particular happened—nuth'n but what commonly occurs when a feller celebrates his birthday; I whipped three, four of the guests enduring of the evening, and a bunch of 'em teamed up and whaled me. Outside of that there wasn't nothin' strange came off and I d'know as you'd call them things strange under the circumstances."—Kansas City Star.

RECORD TRACK LAYING FEAT

Performed By Sturm & Dillard on Chesapeake & Hocking Railway.

Contractors Sturm & Dillard Friday laid 1 1/4 miles of single track on the Pickaway township Chesapeake & Hocking Railway right-of-way; when it is considered that these steel rails weigh 130 pounds to the foot it is a remarkable feat of engineering skill; to enable them to do that amount of work the Contractors used two tractors leased of Wesley Justice of this city, to drag the heavy rails ahead of the steel gang.

Sturm & Dillard's contract for steel laying extends as far south as the viaduct that crosses the Scioto Trail at the Samuel Boggs farm.

By tomorrow the single track will be completed as far as the Scioto creek bridge and early next week The Bessmer Steel Co. will begin work on that bridge.

MAN WITH HOLE IN HEAD WILL LIVE

Hammond, Ind., July 8.—(UP).—The man shot through the head with a steel bar 24 feet long had lived 12 days today and his physician was confident he would get well.

Paul Kosty, who is 37 years old and a foreman at the LaSalle steel plant in Hammond, was working over a mill planing bench when the accident occurred. He stooped to pick up a wrench. The steel bar, 24 feet long and three-quarters of an inch in diameter, flew from the machine which held it and struck Kosty on the left side of the jaw.

Kosty has a hole in his head 3/4 of an inch in diameter from the left side of the jaw to just below the right temple as a result of the accident.

AGREEMENT

Mr. Murphy was taking his first flight in an airplane. The pilot was taking him over San Francisco and when they were about 3,000 feet up the plane went into a nose dive.

"I'll bet 50 per cent of the people down there thought we were falling," the pilot remarked.

"Sure," answered Mr. Murphy, "and I know danged well 50 per cent of the people up here thought so, too."—Success.

Seasoned Right to the Second

"Bridget! What in the world is my wrist watch doing in the soup?"

"Shure, mum, ye towld me ter put a little toime in it an' that's the littlest wan OI cud foind!"—Progressive Grocer.

DIDN'T DRESS SWELL

Mary—Does he dress well?
Alice—Dress swell? I should say not! His wife does all the swell dressing in that house.

Landing a Passenger

Ruth rode in my new cycle car
In the seat in back of me;
I took a bump at fifty-five,
And rode on ruthlessly.

What's in a Name?

"My niece is quite theatrical," remarked old Mrs. Blunderby. "Next week she is taking part in a Shakespeare play at college."

"Which of his plays is it?" her caller asked.

"Edith mentioned the name of it, but I'm not sure whether it's 'If You Like It That Way' or 'Nothing Much Doing.'"

Mental Control

"The next thing, I suppose," growled Mr. Grump, who thought his liberties were being tampered with, "they'll be controlling a man's thoughts by government edict."

"They're doing that now indirectly," answered his companion. "I spend most of my time thinking about how I'm going to pay my taxes."

Peroration

An Imported orator was thundering against a candidate for justice of the peace.

"Upon what meat does this, our Caesar feed?" he demanded.

"I'm a vegetarian," piped up the somewhat frightened candidate.

That seemed to settle that.

MIGHT GET STUCK

"She has sharp ears."
"Avoid whispering in them then—you might get stuck."

One Male Job They Shy At

Saleswoman—Certainly, madam. I've a thing that would suit you down to the—er—knees.

PLAN HIGHWAY OF 2,275 MILES

Concrete Roadway From Chicago to Los Angeles Is Contemplated.

Chicago.—A concrete highway from Chicago to Los Angeles will link the corn fields of the Middle West with the oil regions and fruit lands of the Pacific. This is the plan of the recently formed United States Highway 66 association, which visualizes a "Main Street of America," that will serve both as a commercial and a military highway. Travel time between the two points will be reduced by several days, it is expected.

This pavement will be about 2,275 miles long and the width in heavily traveled sections will be as much as 40 feet. The mapped-out route is 200 miles shorter than any other highway or railroad between Chicago and Los Angeles and when finished the trip may be made comfortably in eight or nine days.

United States Highway 66, its official name, follows established main roadways as much as possible. In Illinois, for instance, the route follows the 275-mile paved highway from Chicago to St. Louis. However, in the interest of shortened travel United States Highway 66 breaks to the southwest from the Billionaire to Springfield and Joplin, even though a 250-mile stretch of concrete now extends westward from St. Louis to Kansas City. About half of the highway is paved from St. Louis to Joplin.

Expect Co-operation.

From Joplin on there is very little paving, but through the centralized organization highway authorities are certain that the co-operation between county, state and federal government road builders will bring about an early completion of this concrete ribbon.

The route extends to Tulsa, Oklahoma City and Texola from Joplin and then touches an oil region of upper Texas. The roadway then passes on to mysterious Santa Fe, N. M., and from there to Albuquerque, which, hardly anybody can spell, and on to Gallup, made famous by eastern scenario and magazine writers who have been there.

Holbrook, Flagstaff and Needles are high spots on the thoroughfare through the tombstone and cactus state of Arizona. The Rocky mountains are crossed without encountering any dangerous passes, welcome

news for prospective tourists from the Great Plains. The roadway then drops down to San Bernardino, Calif., and Los Angeles is but a short journey away.

Permanent Organization.

The United States Highway 66 association is a permanent organization formed by chambers of commerce and automobile clubs, representatives and state officials from the Middle West to the Pacific coast. John T. Woodruff of Springfield, Mo., president of the association, has been engaged in both railroad and highway development work as an attorney and an engineer. Mr. Woodruff assisted in revolutionizing highway building in his state.

"A great highway," declares Mr. Woodruff, "cannot be worth its purpose unless, like a trunk-line railway, it connects our centers of population, taps our rich agricultural and mining regions and presages expansion for millions of young citizens in undeveloped territories. United States Highway 66, in my opinion, does all of that and more; it will, by every token, become America's 'Main street' in reality as well as name."

Special Outfit Saves

Fallen Totem Poles

Vancouver, B. C.—The dominion government totem pole preservation outfit has arrived at Skeena Crossing, B. C., with a flat car load of hoisting gear including the huge derrick used for erecting fallen poles. This gear came from the totem pole village of Kitwanga, where the government work of totem pole preservation was carried on during the last two seasons to the great interest of the tourists who are allowed to walk through the Gitsan Indian village while the trains stop for water.

This year the work of totem pole preservation will be carried on at Gytsegynela, a village about a mile below Skeena Crossing, where there are 18 huge totem poles close to the river bank plainly seen from the railroad car windows for over half a mile on the opposite side of the Skeena river.

The northern end of the Pacific highway is at present within four miles of Gytsegynela so that automobile parties from many parts of the United States can now come close to this remarkable collection of totem poles and in a few weeks the road gang will resume work on the highway and push it on past Skeena Crossing, Gytsegynela and well toward Kitwanga during the present season.

Sprinter's Stride

The average stride of a sprinter is from 7 feet 6 inches to 8 feet.

POLLUTED SCIOTO

Editor Ohio State Journal:

Your editorial, "Boating On the Dams," in this morning's State Journal, I have just read with mingled emotions, as I do many of your excellent editorials.

As an interested reader permit me to suggest that you write something about the beauties of the Scioto River south of Columbus during the hot months of July and August. You might dilate upon the wonderful green tints of its stagnant water and the various perfumes which arise therefrom. For the benefit of timid boatmen or waders you might mention that not even crayfish or turtles inhabit the stream and that no "great depth of water" must be "constantly kept in mind."

I am sure it would be eminently proper for you, interested as you are in all the citizens of this state to suggest to the state board of health that it take a day off and picnic on the bank of the Scioto south of Columbus below the point of entrance of the water which is first illegally impounded above Columbus and, after flushing the sewers of your growing city, then is turned into the river below your city.

If the state board of health ever takes the initiative in any matter of state hygiene, such an outing might produce action. I feel sure the state board of health would not enjoy such a lunch any place in Pickaway County during the heated months of summer and fall.

Please get up a little party of your friends and visit this once beautiful river south of Columbus and then give us your honest editorial opinion of the crime which our capital city is committing by impounding the water of the Scioto and then emptying her sewage into the diminished stream, polluting it for unnumbered miles, which were once the playground and fishing resort of citizens south of your "rapidly growing city"—a city so selfish that it boasts of miles of fine water "as enticing as any in the state."

HOWARD JONES.

Circleville, O., July 4.

A Seasoned, Conservative Security

THE BUCKEYE'S 5% Certificates of Deposit; \$50 to \$100,000

Interest from date of issue, mailed semi-annually, or compounded with the principal, if desired.

VALUE OF LIME

In Chick Ration Has Been Fully Demonstrated.

If chick rations are adequately supplied with lime and phosphorus, will additional amounts of lime prove beneficial or harmful? The value of lime and phosphorus in the ration of the growing chick has been fully demonstrated, says R. M. Bethke, animal nutrition specialist at the Ohio Agricultural Experiment Station, in answering this question.

Dr. Bethke's experiments show that the amounts of lime and phosphorus necessary in the ration to protect against leg weakness vary inversely with the amounts of the anti-rachitic factor supplied the chick. Within certain limits the more lime and phosphorus present in the feed mixture the less the amount of cod-liver oil or ultra violet light required. Or in other words, the greater the anti-rachitic factor the lesser the need of lime and phosphorus.

Several recent experiments on young chicks showed that excessive amounts of lime were harmful. Lime in the calcium carbonate, limestone, or oyster shells in amounts of 4 to 5 percent in addition to rations containing cod-liver oil and 5 percent bone meal caused slower and more uneven growth and increased mortality. Amounts of around 2 percent of lime in these rations proved beneficial.

Old Political Gathering

Methods Used to Control Yellows

Disease of Cabbage Is Caused by a Fungus Which Persists in Soil.

(Prepared by the United States Department of Agriculture.)

Yellows of cabbage, through injury to the fibrous root system, stunts the plants, giving them a lifeless, yellowish green color. It may usually be noticed in two to four weeks after transplanting, but may appear in the seed bed. Yellows is caused by a fungus which persists in the soil for many years. The disease greatly retards the growth of the plants, death resulting, in the worse cases, within two weeks or so after transplanting. Most of the plants, however, continue a sickly existence for a month or more, and a few live through the summer, heading imperfectly.

Only Safety Plan.

While various methods are employed to control the yellows, the only safety lies either in planting the crop on disease-free land or in using only yellows-resistant varieties. The Volga and Houser are the most resistant of the older domestic varieties. The Wisconsin Hollander is a disease-resistant selection from the standard winter variety Hollander, or Danish Ballhead, and should be planted wherever the late crop is grown on "yellows-sick" soil. All Seasons and Brunswick, two of the leading mid-season varieties used for sauerkraut, are now known in the trade as Wisconsin All Seasons and Wisconsin Brunswick, respectively.

Disinfection of Seed.

Disinfection of the seed reduces the danger of spreading the disease to new districts. Put the seed in a sack of a thin woven material, such as coarse cheesecloth, large enough to allow thorough agitation of the seed. Soak for 30 minutes in a solution composed of corrosive sublimate (mercuric chloride) and water in the proportion of 1 to 1,000. This chemical can be obtained from drug stores in tablet form, the package containing directions for making up the solution. After soaking, thoroughly rinse in clean water, then split the sack and spread out seed in a thin layer to dry, stirring as necessary. Corrosive sublimate is a deadly poison, and both tablets and solution must be kept out of reach of children and farm animals.

Check Depredations of Different Garden Pests

Some insects are not fussy about their diet. They will devour almost any of the vegetables. Of this type are cutworms, plant lice, flea beetles. But the leaf hopper dines chiefly upon potatoes, tomatoes, strawberries and beans. A nicotine sulphate or dust will control this pest, and also plant lice.

Favorite foods of the flea beetle are radishes, cabbages, turnips, tomatoes, potatoes and eggplants. This pest usually feeds on the underside of the leaves, and can best be destroyed with nicotine dust or bordeaux mixture. About the only way to check the depredations of those bandits, the cutworm and the grasshopper, is with a poisoned bran mash.

Asparagus has a beetle of its own. Spraying from both sides with lead arsenate will put a quietus upon this red, black and yellow feeder; also upon the Colorado potato beetle, the tortoise beetle, which attacks the sweet potato; the horn worm and fruit worm, which are the tomato's chief foes, and the worst enemies of the plebeian but necessary cabbage—the cabbage worm and cabbage looper.

Sudan Grass Is Favored for Live-Stock Pasture

Sudan grass has proved to be the most satisfactory summer pasture for all classes of live stock in Kansas, according to the report of L. E. Call, dean of the division of agriculture at the Kansas State Agricultural college and director of the Kansas experiment station. It retains its succulence in dry weather and withstands drought better than any other pasture crop under observation by the experiment station.

Sweet clover is less valuable for hogs than alfalfa but is satisfactory for cattle and sheep.

Orchard grass has proved to be one of the most satisfactory permanent pasture grasses. It is easy to start, stands grazing well, and all classes of live stock relish it throughout the entire grazing season.

Agricultural Facts

Forcing yields up forces costs down

Honey bees seldom live more than six weeks.

Every farmer who does not keep his soil built up should be run down for robbery.

Labor-saving equipment is the broom that helps to sweep drudgery out of farm homes.

Farmers have equally as good scientists doing research work for them as does industry. The point wherein the farmers or agriculture fall short is that it does not have the executive power with which to put into effect the results of experimental work.

THROCKMORTON SUGGESTS FOUR YEAR TERM

Cedar Point, July 8.—(UP.)—Prof. A. H. Throckmorton, Western Reserve University, today urged the Ohio State Bar Association to get behind a constitutional amendment to provide four-year terms for the governor and all elected state officers.

"Make the term of office four years and forbid re-election," Throckmorton told the delegates here, "and you'll have a much better government."

"Four years will give the governor time to work out his policies and at the same time the prohibition of more than one term will take away his incentive to 'play politics' and build a machine for re-election purposes."

He advised against the calling of another constitutional convention in 1932 on the grounds that it was not needed.

California Coed Wants to Fly to Honolulu

San Francisco.—The realm of transoceanic flyers, which thus far has belonged exclusively to man, is threatened with an invasion of the fair sex.

With two women already making plans to fly over the Pacific as fellow adventurers with the men who will pilot the planes, a coed at the University of California recently appeared with an offer to accompany any Pacific flyer who would take her along as a companion. She is Miss Rose Anderson.

The two who are making definite plans for flights are Miss Mildred Doran of Flint, Mich., who expects to take passage with Augie Peddler, Michigan aviator, who has entered for the mainland-to-Honolulu flight, and a woman who has made plans to fly from Dallas to Hongkong.

LITTLE things taken care of relieve the mind.

Suspicious!

The loyalty of a magician's assistants is frequently put to the test by people who would like to learn his secrets, but the helpers are usually equal to the situation.

George White has been with Thurston ever since the magician started around the world with his show. One day an inquisitive busybody slipped George a cigar and said to him: "How does Thurston make the woman float in the air without any support?"

"I don't know," George replied, "but I think there must be some trick about it."

NAME FILM MAN

In Oil Probe—Cecil B. De Mille Charged With Usury In Julian Pete Scandal.

Los Angeles, July 8.—(UP.)—Cecil B. De Mille, motion picture producer, was charged with usury in a complaint issued today in connection with the Julian Petroleum Corporation crash.

The complaint was signed by E. J. Lickley, city prosecutor, and charged that the movie magnate received a \$12,000 bonus on a \$60,000 loan to the oil company which was wrecked several months ago.

De Mille's name was among a list of 100 individuals turned over by the district attorney to the city prosecutor when it was decided that indictments against them could not be obtained from the grand jury.

Wall Street Invests In Ultra-Violet Rays

Anton Schutz' etching of new Equitable Trust Company Building, first American skyscraper to utilize new glass for admitting sun's vital rays indoors.

IF ULTRA-VIOLET rays can produce more prosperous bankers and fairer stenographers, the thousand or more executives and employees of the Equitable Trust Company bid fair to become the envy of New York's financial district.

When they move into quarters in the company's new building, already towering above the familiar landmarks of Broad and Wall Streets, they will be working daily in an atmosphere that differs from that of neighboring offices by the presence of the vital rays of sunlight.

In his announcement, Lyman Rhoads, vice-president, states that, as a definite move to maintain the most healthful conditions for its personnel, the company will use vitallight in the windows of eighteen floors of the building.

"We are told that our installation is the first instance in this country where a skyscraper office building will utilize the scientifically-established health benefit of the sun's vital rays," says Mr. Rhoads, "al-

though prominent London bankers are said to have been profiting from similar installations for some time.

"We know that office workers do not have enough opportunity to get out under the sun. We know that the most valuable part of the sun is excluded by ordinary window glass. Through this discovery by an English scientist, our company plans to bring the healthful ultra-violet rays of outdoor sunshine indoors for maintaining the physical welfare of our staff while they work.

"If the exigencies of business rob its men and women of natural physical advantages and if science perfects means for returning the stolen goods, it seems to us to be the duty of business to admit the theft and to make amends by accepting the contributions of science.

"If we were to view this move solely as an investment, on which we might expect a profitable return, we are confident that the vitallight windows of our new building would give us that return in a newly invigorated personnel and a lessened absentee list."

GOVERNMENT COSTS PEOPLE 11 BILLION DOLLARS YEARLY

Figures Represent the Aggregate Expenditures of Federal, State and Local Governments.

Washington.—The total cost of government in the United States for the fiscal year 1925 was \$11,124,000,000, compared to \$10,983,000,000 for 1924 and \$2,919,000,000 for 1913, according to the national industrial conference board, as announced recently. These figures are the aggregate expenditures of federal, state and local governments, and include capital outlays and debt requirements.

The increase over 1924 was despite a \$365,000,000 decrease in the federal government's disbursements. Federal expenses increased again in 1926, however.

"Although the federal government in 1925 succeeded in checking the rising tendency of its expenditures through a consistent policy of economy and judicious debt retirement there is little hope that departmental expenses can be much further reduced owing to the increasing demand for necessary public service of all kinds," said Magnus W. Alexander, president of the conference board. "State and local governments have generally followed exactly the opposite policy, spending more and more from year to year and borrowing whatever they needed to make up the discrepancy between tax collections and expenditures."

Local agencies in 1925 expended \$5,820,000,000, according to the board's figures, as against \$5,421,000,000 in 1924 and \$5,136,000,000 in 1923. State governments spent \$1,530,000,000 in 1925, \$1,441,000,000 in 1924 and \$1,244,000,000 in 1923. Federal expenditures for the fiscal year 1925 were \$3,765,000,000; for the two preceding years, \$4,121,000,000 and \$3,885,000,000. In 1926 they increased to \$3,936,000,000.

The increase in population has been more rapid than that of expenditures, however, so the per capita cost of government decreased slightly in 1925. The per capita expenditures in 1925, according to the board's computation, were \$96.14; for 1924, \$96.58; for 1923, \$91.90; for 1913, \$30.24.

Future Generations

Planting and raising trees for future generations are one of the activities of electric power companies of which few people hear. A single company in northern New York state planted 4,000,000 trees between 1914 and 1926 and expects to make the total 10,000,000 by 1930.

Million Miles Flown for Each Fatality in U. S.

Newark, N. J.—One can now fly more than 1,000,000 miles to the risk of a single fatality. This is the present situation in this country as established by the air-mail service and which is welcomed by those interested in commercial aviation enterprises. In the army and navy the distance flown to a fatality is about one-half this rate due to the greater inherent hazard called for by military requirements.

Hazards in commercial flying are rapidly diminishing in proportion to the distance traveled, as the area of operations expands. This is the preliminary conclusion of Dr. Frederick L. Hoffman, consulting statistician, Prudential Insurance company, who has for several years been investigating the situation. Doctor Hoffman last year made 14 flights himself, covering more than 2,500 miles of air distance. He is most enthusiastic in his anticipation for the future of flying, believing that in a few years flying will be as common on this side of the Atlantic as it is in Europe at the present time.

Doctor Hoffman is also of the opinion that recent legislation providing for the federal supervision of flying tends strongly in the direction of greater safety by providing for thorough inspection of all aircraft and periodical examination of pilots.

War Hero With Many Medals Asks for Job

Los Angeles, Calif.—An appeal to City Engineer Shaw to find in his department a position for Louis Van Iersel, said to have received more decorations than any man who served in the World War, was made by Dr. A. D. Houghton of the state committee of the hospital department, American Legion. Iersel, whose health was undermined during the war, formerly worked in the city survey department of the engineer's office.

Iersel has received medals from the king of England for life-saving at sea; the French Croix de Guerre for rescuing 16 wounded comrades; a second Croix de Guerre for capturing 65 Germans, five of them officers, during the battle of the Argonne; the Congressional Medal of Honor and the Medaille Militaire; the Italian War Cross; the War Cross of Montenegro, and life memberships in the American Legion and the Disabled Veterans of the World War. He also received the "Hero" medal of the Breakfast club recently.

A Thought for Today

Fortune is ever seen accompanying industry.—Goldsmith.

DEAN VIVIAN DEFINES ACT OF FARMING

This is the Only Industry in Which All the Family Live at the Plant.

Members of the French Academy, once decided to define "lobster." Having reached a conclusion, it was submitted to Cuvier, greatest of French naturalists for his approval. This is what they wrote, "A lobster is a red fish that swims backwards."

Cuvier replied; Gentlemen, your definition is admirable, with certain exceptions: The lobster is not a fish, it is not red and it does not swim backwards."

This is illustrative of the fact that it is no simple matter to give a definition which will bear expert analysis. Would you care, for instance, to submit a definition of "farming?" The question was submitted to Dean Alfred Vivian, of the Ohio State University, College of Agriculture. He is amply fortified to define the term. This is the definition he gave. It transcends dictionaries and agricultural journals.

"Farming is; first, a manufacturing business," he said; second, an art based on broad applications of all the natural sciences, of economics and sociology, and third, a mode of life."

"From a purely business angle, farming is a manufacturing activity, for the farmer, working in cooperation with nature, takes a few gases from the air, some minerals from the soil, and by a synthetic process manufactures them into complex products."

"It is easily demonstrated that all of the natural sciences; biology, physics, chemistry and the rest, have a bearing upon farming. Economics and sociology touch definitely upon farming, for the farmer has his own business to run and his own social contacts to maintain."

"As a mode of life, it is distinct. In America, at any rate, farming is peculiar in this one respect; it is the only industry in which the family lives right at the industrial plant. Farming, furthermore, is the only industry in which the whole family has a part."

And this is farming, according to the highest authority in Ohio.
George U. Marvin.

DO YOUR OWN THINKING.

For fifteen years, old Tom Smith had been running the pumping engine at Brown's Falls. For fifteen years, old Tom climbed up twelve feet on a ladder every day to squirt oil in a little hole in a valve-motion rock-shaft.

One day he slipped and nearly fell. The superintendent saw it, investigated and said: "What were you doing up there?"

"Shot a little oil into that hole up there."

"What hole?" returned the superintendent. Tom showed him.

"Why, man!" exclaimed the superintendent, "that's no oil hole; that's only a lathe center—what they turned the shaft on when they made it."

So it was. We all know how old Tom felt when he found out that the hole he had faithfully oiled so long was only a blind alley. That's the difference between men—some use their brains and some don't.

Did it ever occur to you that the man who needs much supervision pays for it? He certainly does. He pays the difference between what he might be getting and what he is getting for his work. The more you know and the more thinking you can do for your work, the more you are eventually going to be paid. Then, too, the more you know and the more thinking you can do for the boss, the sooner will he put you where you can supervise the work of others and be paid accordingly. Do your own thinking.

Cause for Exasperation

"What exasperates me more than anything else about the boobies who differ with and from me on politics, religion, the money question, the tariff, weather omens and the gulf toward which we are rapidly and inevitably drifting," said J. Fuller Gloom, the human hyena, "is that they are so infernally proud of their own idiocy."—Kansas City Times.

Forest Fires in France

France has little forest land, and the serious losses last year from forest fires have created great concern. During the year there were 130 serious fires and the burned areas aggregated sixty square miles. The monetary loss is estimated at 16,000,000 francs.

Old English Institution

Waits in the Middle ages in England were a body of musicians kept by some great persons to announce the hours of the night. Many cities and towns also had their regular waits. After a time the name was transferred to persons who walked the streets about Christmas time singing Christmas hymns and carols.

POISONED DOG.

Somebody poisoned my dog today,
Tho he never did anyone ill;
And so he is thru with his canine play
And his wagglety tail is still.
No more shall I walk in the field
With him
Along at my side to jag,
And—I don't care if my eyes are dim
Somebody poisoned my dog.

He was homely, I know, as a dog
could be,
And only a mongrel, too;
But I loved the old fellow and he loved me
As people and dogs may do.
Nothing on earth could disturb his trust,
Or his love and faith begot,
And now he lies here at my feet in the dust—
Somebody poisoned my dog.

I wonder how any one could have
done
This poor little fellow harm;
But here he lies—his race is run—
Tho his body's still soft and warm.
My life is lived on a peaceful plan,
My pace is a quiet jog,
But—I wish I could find the snake of
a man
Who poisoned my little dog.

Historic Conference

The congress of Berlin was a conference of the European powers held in Berlin in 1878 at the conclusion of the Russo-Turkish war, and it concluded with the treaty of Berlin, which settled the affairs of Europe for a time. These conditions were changed by the treaty of Versailles in 1919, ending the World war.

Old Jewish Coinage

The gold talent of the Jews in ancient times was equal to 10,000 shekels; the silver talent to 3,000 shekels. The Jews did not possess coined money until after the Captivity, and the earliest allusions are to the coins of Persia.

Noiseless Screen Doors

The constant banging of a screen door in summer is unpleasant, and it is very hard on the door. It can be prevented by fastening one-inch pieces of felt or very thin pieces of cork on the part of the door-frame where the door strikes. They may be nailed on, but are best glued, and when glued will remain in place a long time. There should be one piece near the top of the door and another near the bottom.

This applies also to any other door and to cupboard or bookcase doors.

Took Name From Goddess

The term "cereal" is derived from Ceres, the goddess of Agriculture.

SALE

CIRCLE CITY DAIRY

FOLKSBURG ITEMS

The hot weather has sort of sapped us of our vitality this past week and left us contented not to disturb things much. And, maybe some of the readers know the feeling, like as for instance, you half way make up your mind to fix a screen door that won't stay shut, and then you remember you'd have to walk out thru the sun to the woodshed for a hammer, and you just let it go.

But, outside of ourselves, things in Folksburg are stirring along right lively. And, somebody just remarked that there's not much sale for the fly swatters any more, on account of fly swatting as a summer entertainment has about passed out for lack of time to concentrate on it.

The Felix Cobb family went to a picnic over at Hauger's grove last Sunday. They took a big dinner which they meant to eat, but which they didn't, for the reason that Felix set the basket in a cool place by a log and it got full of red ants.

Lewis Jackson got a letter the other day from his boy who is up in the city, and it said he hadn't been quite able to make expenses, and would they all chip in and send him money to buy him a new suit of clothes. And, after Lewis read it over, he said there was another chip off of the old block.

Andrew Allen went over to Albany last week as a delegate to some kind of a lodge gathering, and he was so impressed by the big parade that he marched in, that he's been trying hard to corner some of his friends and tell them all about it. But they've been sort of dodging him till it wears off of his mind a little.

Miss Mabel Young, our well known telephone operator, was visited last Sunday by one of her admirers from out of town. And he managed so often to show a twenty dollar bill he had, that she got the impression that he must have been so surprised at having it that he wanted to look every little while to see was it real.

Somebody has remarked that when you go in Will Deal's real estate office he always appears terrible busy, but when you analyze close, seems like he's mostly picking things up and laying them back down again.

Some strangers, who passed thru town Tuesday in an automobile, were terribly taken up with Tom Jackson's young bull pup which he has promised to hold until Freddie Brown can save \$2 to pay for it. And, seemed like they couldn't understand Tom's viewpoint when they offered him \$15, and he wouldn't sell on account of he'd promised to hold the pup for Freddie.

Wesley Mills was speaking recently about how when anybody gets famous they're pestered a good deal by people wanting their signature as a souvenir; and he said he had been bothered some himself by people who wanted him to sign his name, and where they always wanted it was on a note as security.

Israel Treadway's wife has been invited to spend a week or two with her sister over at Newport, the one that's reported to have married tolerably well. And, Israel would like for her to go, only he's afraid that what she'd see would cause her to come back feeling a little disappointed with their own domestic outlook.

Alec Powers and the rest of the Town Board met Wednesday night to talk about building a new sidewalk on Mulberry street. And Alec told the others right at the start that he didn't want to be contrary, and if they could see it like he did, why there wouldn't be any trouble coming to an agreement.

Tom Riley's young son, Billy Boy, saw a man yesterday who was mighty near plumb bald on his head. And, right away Billy wanted to know how did the man pull out a hair to test his razor when he wanted to shave.

The Other Woman

Mrs. Margaret L. Wood, president of the Anti-Divorce league, said in a recent address in Topeka:

"If married people would only try to please one another, like single people! The whole secret of the unhappy marriage and divorce may be found in the words once spoken by a bricklayer's wife in a law court:

"Judge," said the poor woman, "when a man starts brushin' his clothes and shampooin' his head and cleanin' his teeth, his wife knows there's somethin' in the wind."—Pittsburgh Chronicle-Telegraph.

Record Height for Woman

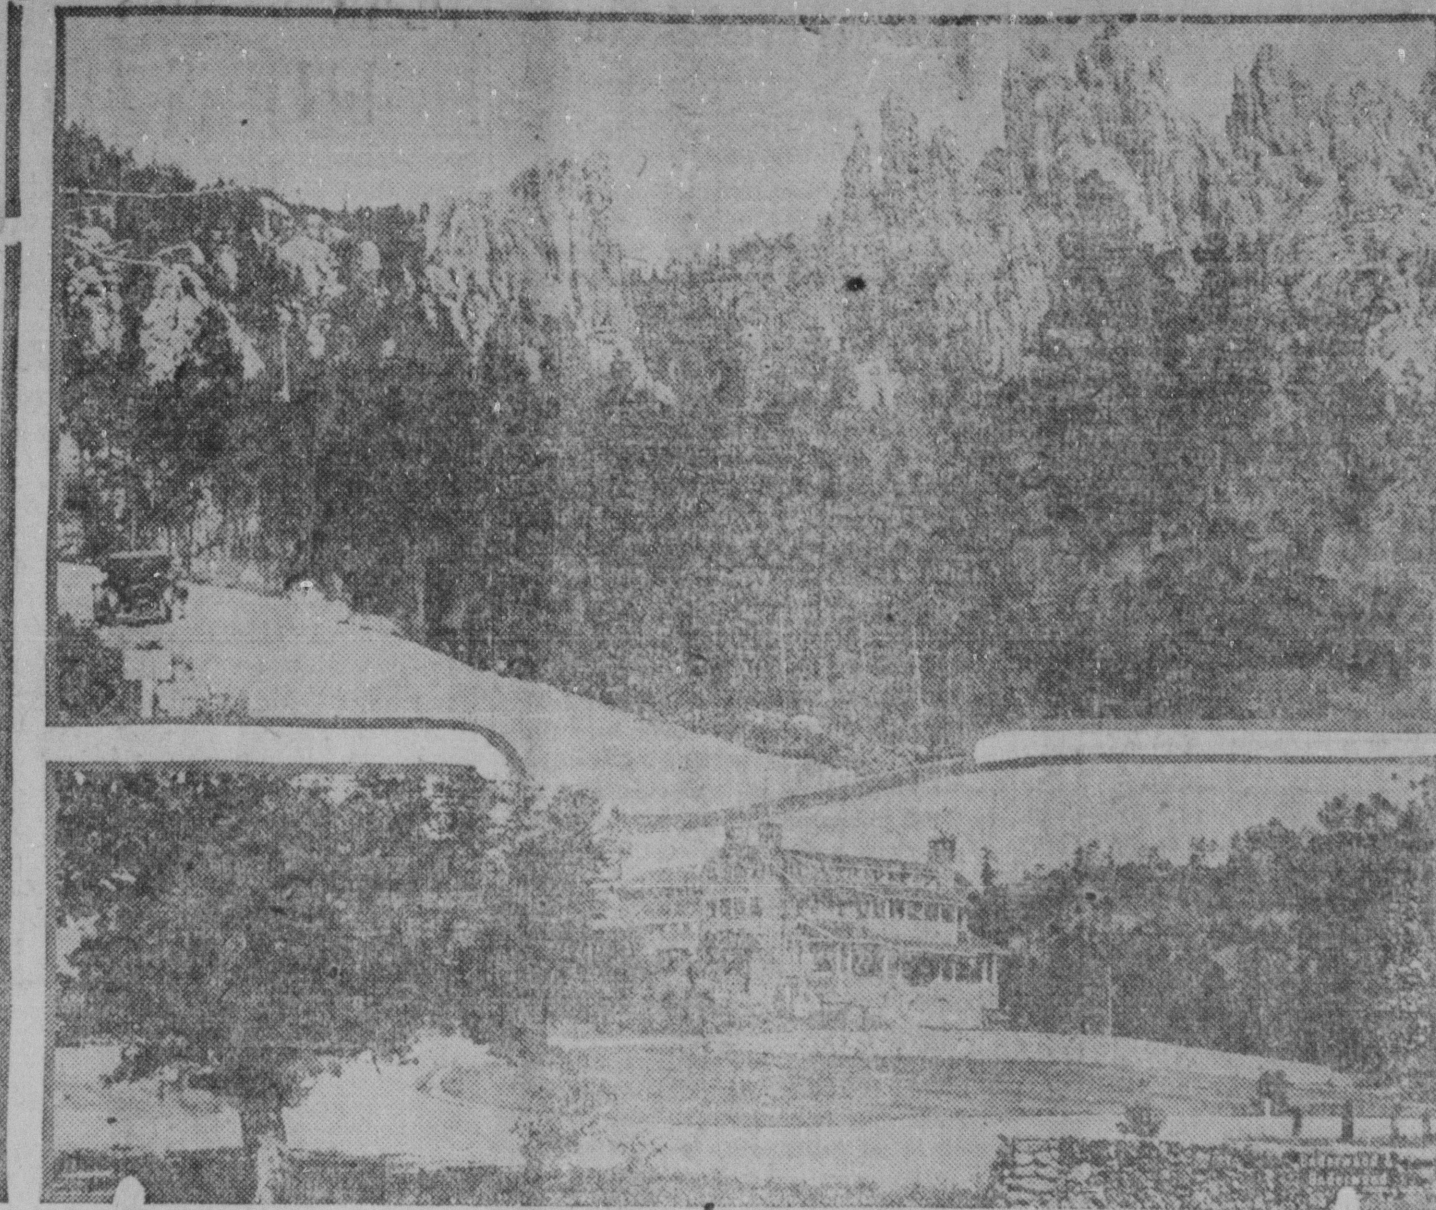

Extremely tall women are not as common as men of unusual height. The tallest woman of whom there is authentic record was an English woman known as "Maid Marian," who was on exhibition in London about forty years ago. She measured 8 feet 2 inches.

El Morro, San Juan, Becomes a Soldiers' School

A view in the old fortress of El Morro at the entrance to San Juan harbor, Porto Rico, which has just been converted into a schoolhouse for Porto Rican members of the American army stationed there.

Canada Also Suffers From Disastrous Floods

Canada, like the Mississippi valley, has been having floods that in some regions are the worst in a quarter of a century. This photograph was taken at Brandon, Manitoba, which was entirely inundated, 18,000 persons being rendered homeless.

AMUSEMENTS

"Blind Alleys", deserves a place right at the head of Thomas Meighan's many starring vehicles. In it, Tommy takes a crack at fast melodrama; the result, as might be expected, is darned entertaining.

Owen Davis and Frank Tuttle had a lot to do with the success of "Blind Alleys." The former wrote the story and Mr. Tuttle directed. Evelyn Brent and Greta Nissen in the featured feminine leads, give Mr. Meighan capable support and the audience many heart throbs.

To relate the plot would detract from one's interest on seeing the picture but the relating of a few of the highlights will show exactly what's to be expected in "Blind Alleys." It opens with an impressive marriage ceremony in which Tom, a merchant marine captain, marries his Cuban fiancée, Miss Nissen. They journey to New York on their honeymoon and things start happening. First, the young husband is knocked unconscious by an auto in Times Square; Then Greta falls into the hands of some thugs; Tommy leaves the hospital, goes into a coma and a strange woman nurses him back to health.

And —to catch my breath—that isn't the half of it! "Blind Alleys" will remain at the Met for two days more. Paramount produced it. Emmet Crozier prepared the screen play.

PERSONALS

Mrs. Allie Clark visited relatives in Wilmington Sunday.

W. A. Teegardin and J. J. Tinkey were business visitors in Columbus today.

Mrs. W. J. Graham accompanied by Miss Avis Reid, spent the day in Columbus.

Captain W. B. Davis, of Williamsport was a business visitor in Columbus today.

Mrs. James Sines and son, Fred, of Columbus, were visitors in the city Saturday evening.

Mr. and Mrs. John Shelby and son, Jack, left Monday for a visit to relatives at Aurora, Illinois.

Mrs. Della Carter and son, Orris, left Monday for Huntington, West Virginia, to visit relatives.

Don Allen, of Columbus, spent Sunday with his father, A. E. Allen, and family of South Scioto street.

Virginia Hulse, of Jackson township, was the guest of Bonita Hulse from Thursday to Saturday of last week.

John Bowsher, of Clarksburg, was a business visitor in Columbus today. Mr. and Mrs. Dewey Sowers spent the day in Columbus.

Miss Ruth Deitzel, of Tiffin, who has had charge of the Bible Vacation school, has finished her work and returned home Saturday.

Mrs. O. S. Harman and Mrs. C. F. Wolfley, of Belle Center, who have been guests of Mrs. Mary Kimmel and Mr. and Mrs. Fred L. Fickard, have returned home.

Mr. and Mrs. W. B. Cady and daughter, Virginia, who have been visiting Mr. and Mrs. Scott Tipton, and family at Pataskala, returned home Sunday.

Mr. and Mrs. Arnold Hastings, of near Atlanta, and Mrs. M. E. Van-Riper, of this city, motored to Zanesville Sunday and attended the funeral of Mrs. Pansy Soward, an old friend of Mr. and Mrs. Hastings.

Mr. and Mrs. J. Wallace Crist and son, William, have returned home from a motor trip to the east. They visited New York City and came home by the way of the Hudson river and Niagara Falls route.

Mr. and Mrs. Joe B. Work and daughter, Julia Jane, left Sunday for Warren, Indiana, where they will be the guests of relatives. His father, Rev. Granville Work is in temporary charge of the church, of which he was once pastor.

Sister Mary Celestine of Leonard Town, Maryland; Mr. and Mrs. Carl Snider, of Detroit, Michigan; Mr. and Mrs. William Washburn and son, Joseph, of Chicago, Illinois, were called here by the serious illness of Edward Snider, son of Mr. and Mrs. George Snider of South Court street.

Mr. and Mrs. Gus McNaughten and Marcus R. Hawks, of Columbus, were Sunday visitors in the city.

Mrs. Harry Imler, of Cleveland, who has been the guest of her father Charles Fausnaugh and family, has returned home. She was accompanied by her sister, Miss Helen Fausnaugh.

Hardly Worth Mentioning

"What is half of one-third?" said the teacher to Ted, and the boy, unaccustomed to such vague things and obscure, said: "I don't know for sure; but it can't be so awfully much."—Boston Transcript.

WE SAY IT WITH CHECKS

If you were laid up by accident, some of your friends would send you flowers. Others would write or call to see you.

But have you a friend who would bring you a check for \$100, \$200, \$400, or more, every four weeks for as long as you were unable to work?

You have it, if you have Accident Insurance with

Dig Up Ruins Believed to Be Timur's Palace

Samarkand, U. S. S. R.—Remains of walls of what is believed to have been one of the palaces belonging to Timur or Tamerlane, the renowned Oriental conqueror of the Fourteenth and Fifteenth centuries, have been unearthed by excavators here. The walls appear to have been richly decorated with frescoes and other ornamentations.

"Timur the Lame," who carried his victorious arms from the Volga to the Persian gulf and from the Hellespont to the Ganges, had his capital in Samarkand, once the richest city in the Orient, and it was from there that he started on his famous expedition to conquer India. From this venture he is said to have taken back to his native city an immense quantity of spoil and 90 elephants laden with stones of a peculiar quality with which to build his palace.

Silks and Crepes Liked for Travel**Frocks for Shipboard or for Land Excursions Smart and Serviceable.**

Quite the most engaging topic before the reviewer of fashions at the moment, writes a fashion correspondent in the New York Times, is that of traveling togs. There is no escaping them, if one wished to do so, for every shop is offering them, and every designer is picturing clothes suitable for travel in colors so seductive that one who has not planned to go abroad is tempted to rush at once and book passage. If there is no better reason there are all the costumes and accessories with which to outfit one's self and to make the excursion one of pride, thrills and comfort. This outfit is not assembled casually, for there are being offered each season so many new styles in dress for traveling that it is not merely a matter of meeting requirements but of luxuries and all sorts of pleasant things.

Doubtless there was a time when women wore almost anything for traveling, so that it was stout, weather-proof and comfortable. That was before the great change came in the type of clothes for women from the frilly and feminine to the tailored and ultra-sports, as it seemed at first to be. This is the history of all the sort of dress that is now called sports, and which is so far distant from the sensational picture at first presented that now it has become the conventional and universally approved. It is no longer necessary to go about the world, motoring, sailing or by train, wearing a nondescript or unbecoming costume. The broadening of social activities has created a demand for much else, and the creators of fashions are finding in this an opportunity to present their best work.

All sports styles are more attractive this season than they have ever been before, and the most chic, charming clothes are worn in America with which to equip one that less time may be reserved for shopping on the other side. Along with the best work of designers over here are the imported models from London and Paris—frocks, suits, ensembles, wraps and accessories with which to answer the demand.

Smart, serviceable clothes for the sea and for foreign travel are being made to suit the tastes of women of every type. This season, more than ever before, it is possible to dress suitably, comfortably and becomingly at prices most reasonable, and a woman may sail for Europe with the consciousness of being prepared to enjoy her excursion without anxiety about her wardrobe, and leave the shopping experience until the last lap, when she will have the advantage of the autumn collections from which to select her winter apparel.

Radical Changes in Fabric.

One of the radical changes that has come about in traveling dress is in fabric. A woman does not now need

signed in America of the new silk. This answers admirably the need of a simple smart frock which may be worn with or without an overwrap. The crepe is plaited in a cluster at each side of a yoke having a small turnover collar and tie, with a row of small silk-covered buttons ornamenting the middle of the bodice. The plaits extend to the bottom of the frock, and a soft girdle-belt of the material is fastened with small metal buckles. This girdle is repeated with one small buckle as a trimming swathing the crown of the felt sports

A Modified Version of the Sailor Suit Is in Navy Kasha.

not having a ripple brim. The sleeves are long and plain, with stitched cuffs to match the collar of ecru linen. The costume is in one of the new shades of ecru beige.

Another frock of silk is made in the smart two-piece model, a finely plaited skirt and bodice in pale yellow, with which is worn a knitted cardigan of yellow wool with a border of white wool. In a winsome little French model a straight loose bodice is attached at the hipline to the skirt, which is laid in small box plaits. It is buttoned down the front, with square patch pockets at the sides, and illustrates the latest fancy in belting the bodice at the normal waistline with a narrow strap of suede. The frock is of flat crepe in hyacinth blue and is finished all around the edge of skirt, cuffs and pockets with a band of crepe of darker blue, which is matched in the color of the belt. A topcoat accompanies this frock.

Woolen or Worsted.

Styles of dress which are important for an ocean voyage and for general wear include one made of lightweight woolen or worsted, of which there are so many variants now presented by the best designers in this country and abroad. Mohair in the new weaves is ideal for a traveling dress. A youthful slender suit is made of tan mohair. The skirt is plain at the sides with a cluster of deep knife plaits arranged directly in front. This is attached in the usual way to an underbodice of ivory crepe de chine, and the overblouse has a surplice line front, crossing to one side, where it is fastened with three buttons. A band of Havana brown and green finishes the bottom of the skirt and the cuffs and outlines the V-line of the blouse. A long tan coat of the mohair lined with crepe de chine is designed to wear over this frock.

While many of the more dressy frocks and wraps are shown in the lovely pastel shades, these are for occasional wear aboard ship. The practical models are shown in tan, beige—which is stronger than ever this season—and in gray. Gray in every shade from pale Quaker to Oxford is used by the best designers for traveling suits. In some of these another shade, even two may be introduced, and a contrasting color is used. A frock in the popular "jumper" style of medium gray kasha has a line of green about the top of the skirt hem and around the edges of collar and sleeves.

Plain Colors for Travel.

For travel wear, as in all sports dress, plain colors predominate. The variation is in colored borders. In the combination of two or three shades of a color, or of contrasting colors and in brightly tinted accessories. For service the quiet shades of brown, green, tan, beige, blue and gray are used. New names include oak crest, sawdust and leaf brown; sage, almond and fairway green; navy, sindbad and Flemish blue are shown, and a great deal of white. A few checks, stripes and mixtures are to be had, but everything in the nature of patterning is shown in the blouses and scarves. Some of the new overblouses to be worn with two-piece suits are printed in bold, vividly-colored designs, ultra-modern and cubistic in feeling.

Culotte skirts, strongly approved by Worth in his endeavor to introduce the trouser style, are liked by some women for traveling. In an uncommonly chic model received from Paris the trouser effect is somewhat concealed in the arrangement of plaits and panels, although the design makes for comfort.

Black and White Check, Trimmed With Red Flower, Belt, Buttons.

to dress as though she were to sail before the mast, provided only with flannel and homespun. A large part of the traveling frocks for land or sea are silk, especially crepe. On board ship in the summer several dresses of crepe of the heavier weave will be serviceable for morning, afternoon or evening. In the better qualities crepe has a firm texture and sufficient weight to retain its shape and to be of proper warmth for fair weather. On deck, except in midday heat, a sweater, waistcoat or jacket will be grateful, and these, as well as the raglan or other cloth wrap, slip most easily over the crepe.

Flat crepe, canton crepe, and crepe de chine are the kinds most in demand, and these are made in the greatest variety of colors and combinations both as to material and dye. Ideal material for dress of this type, which will serve as well for comfortable, presentable travel ashore, is illustrated in a charming model de-

HAT GAVE WARNING OF OSCAR'S TEMPER

One of the eccentricities that made the late Oscar Hammerstein, the noted theatrical impresario, such a picturesque figure on Broadway is recounted by George Blumenthal in an article in Liberty. "When you saw Oscar Hammerstein coming down the street wearing his funny silk hat, you knew he was in a good humor. But if he were wearing a slouch hat—look out!"

"I recall that at the Manhattan opera house there was a little place beneath the stage which had never been finished," the writer tells. "This 'cave' would admit about six persons and was a great place to be when Hammerstein went on one of his many rampages. He employees called it the Cave of Refuge. Before Hammerstein arrived for the day, we generally had a lookout posted. He would come back and report something like this: 'It's all right—the boss is wearing his high hat.' Or: 'Watch out—he's got on that slouch hat!' The slouch hat meant the Cave of Refuge for us."

Sower's Sure Reward

He who sows, even with tears, the precious seed of faith, hope, and love shall doubtless come again with joy, bringing his sheaves with him, because it is the very nature of that seed to yield a joyful harvest.—Cecil.

Oldtime Toast Glass

A pass-glass is a tall drinking glass marked with horizontal lines to indicate the amount to be taken in response to a toast. Such glasses were much used in Germany in the Eighteenth century.

Watch Your Woolens!

With the summer season, the moth miller is abroad hunting a good place to lay her eggs. She prefers woolens as a good place to deposit her eggs, for there will be good feeding for her young.

Keep the cover on your upholstered furniture, brushed at least once each week, remove all cushions, and use your electric cleaner now and then. DO NOT COVER YOUR FURNITURE WITH COVERS. The young moth will crawl thru the covering and destroy your coverings before you are aware of their presence.

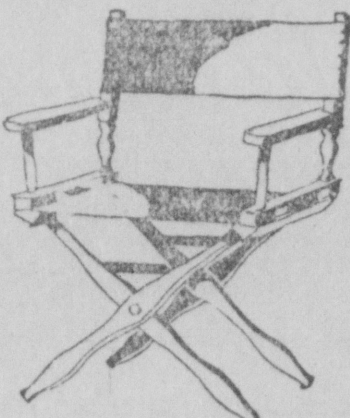

Place your woolen clothing and blankets in a moth-proof chest and cease to worry. We have just received a large shipment

of "Treasure Chests" lined inside with red cedar, with walnut on the outside. They are beautifully finished and will add greatly to the beauty of the room, as well as serve as a protection to your clothing.

Priced from \$16.50 up

Haven't you often wished that you had a folding chair to take with you on picnics and camping tours? We have some that are very fine for that purpose. They fold up into a small space, yet are comfortably lazy. They are very handy around the house when guests arrive, especially for use on the porch. They are strong, holding the largest persons, and yet are low priced.

They start at \$4.25

Briton Finds New Way to Get Auto Repaired

London.—A new way to get one's automobile repaired has been discovered by a London man. The formula is to leave it standing alongside another one of the same make in the hope that the owner of the other car will mistake it for his own and put it in order.
Anyway this happened at a seaside resort recently. A Londoner returned in the evening to the place where his car was parked but on getting into it he found that it wouldn't start. Thereupon he climbed out, removed and cleaned the spark plugs, tuned up the magneto and adjusted the carburetor. The car started off beautifully just as the real owner rushed up shouting, "Police." The first man then found his own car just behind the one which he had so kindly repaired.

HEART SECONDARY, ASSERTS DOCTOR

Cell Activity Forces Blood in System, He Says.

Berlin.—Prof. Martin Mendelschn, who has occupied the chair of diseases of the heart in Berlin university since 1890, has put forward the extraordinary theory that the heart is not the prime power for life, but as an organ plays only a secondary part. His theory is that the activity of the cells of the body, in absorbing and eliminating fluids, constitute the chief motive power in forcing the blood through the system.
In support of his theory Doctor Mendelschn calls attention to the fact that many persons with exceedingly weak hearts continue to live, although in these particular cases it is impossible to believe that their hearts can pump the blood through the body.
Professor Mendelschn first propounded his theory in the new medical weekly, Die Medizinische Zeit, in a recently published article, which subsequently was taken up by Alfred Kerr of the Berliner Tageblatt. An elaborate discourse on the subject is being prepared by Doctor Mendelschn for an early meeting of the medical society.

The author of this new theory contends that "the human body's motive power is represented by the cellular activity of the glands and skin in absorbing and excreting fluids which furnish the requisite fuel for the human motor, whereas the heart and blood circulation merely play a regulative role in distributing such fuel and resulting refuse to and from the various motors throughout the body, namely, the internal, glandular and epidermic cells."

Doctor Mendelschn says that this explains many cases of the burial of persons apparently dead, and he argues that other tests besides cessation of the heart beat are necessary to establish true death.

The Salesman

"Well, old man, what are you doing these days?"
"Oh, I'm selling furniture."
"And what furniture have you sold?"
"Only my own, so far."—Montreal Family Herald.

Taking No Chances

When fire destroyed a Pierre (S. D.) school, one little fellow, his face agrin, ducked under his teacher's arm and tossed his books into the flames. While the fire promised him relief, he wasn't taking any chances.

English Political Term

"Minister with portfolio" is the term given to a member of the British cabinet who has jurisdiction over a special department. "Minister without portfolio" is a term given to a minister of the British cabinet who has no specific department, over which he has jurisdiction.

Be Tolerant

"It is necessary to be tolerant in order to be tolerated."—Norman MacDonald.

Where All Are "Noble"

Every citizen of Montpellier, France, claims that he has the right to call himself baron. In 1537 the baron de Caravette bequeathed his title and estates to the city. Hence, it is argued, every child born in the city may adopt the title.

Her First

A book has been written about the love affairs of George Sand, the woman novelist. No doubt it starts off with Chap. 1.—El Paso Times.

"Some tobacco . . .
but I'll bet it's expensive"

GIVE any man a pipeful of Granger without telling him its price . . . let him judge it solely on taste and every time he'll say, "It must be expensive."
True enough, it is costly tobacco made by costly processes . . . and if packed in the ordinary pocket tin it would be expensive . . . BUT

sensibly packed in foil
it sells for just
ten cents

GRANGER ROUGH CUT

The half-pound vacuum tin is forty-five cents. The foil-pouch, sealed in glassine, is ten cents.

*Liberal allowance
for your old cleaner*

You won't have to postpone owning a Greater Hoover until your old, inefficient cleaner is completely useless. You can know the joy of Hoover cleaning immediately. You can have the aid of the Hoover all through these summer months, when the daily burden of blown-in dust is so great and Hoover helpfulness means so much.

Just call us on the phone. We'll make an appraisal of your old machine—without the slightest charge or obligation—and give you a generous allowance for it on the purchase of your new Hoover.

Just think what a difference

having the Hoover is going to make in your enjoyment of the summer! Think of the extra time you'll have for rest—the extra vitality you'll have for play—if the Hoover is relieving you of the burden of cleaning—and doing it better than it's ever been done before.

"Positive Agitation," the revolutionary cleaning principle of the Greater Hoover, sets a new standard of home cleanliness. If you don't know the untold difference which this amazing principle makes in cleaning, you owe it to yourself to have a Hoover demonstration. Only \$6.25 down, balance monthly, if you wish to purchase.

You can now get "Positive Agitation" in a new popular-priced Hoover model. Ask us about it.

COAL—COAL—COAL—COAL

The time to buy.

N. T. WELDON COAL CO.

July 11th.

Still Falling

At school in Lankesheim the other day, the teacher asked Buddy Cohen if he knew what a falling out meant. "Sure!" exclaimed Buddy. "We have one in our family right now!"

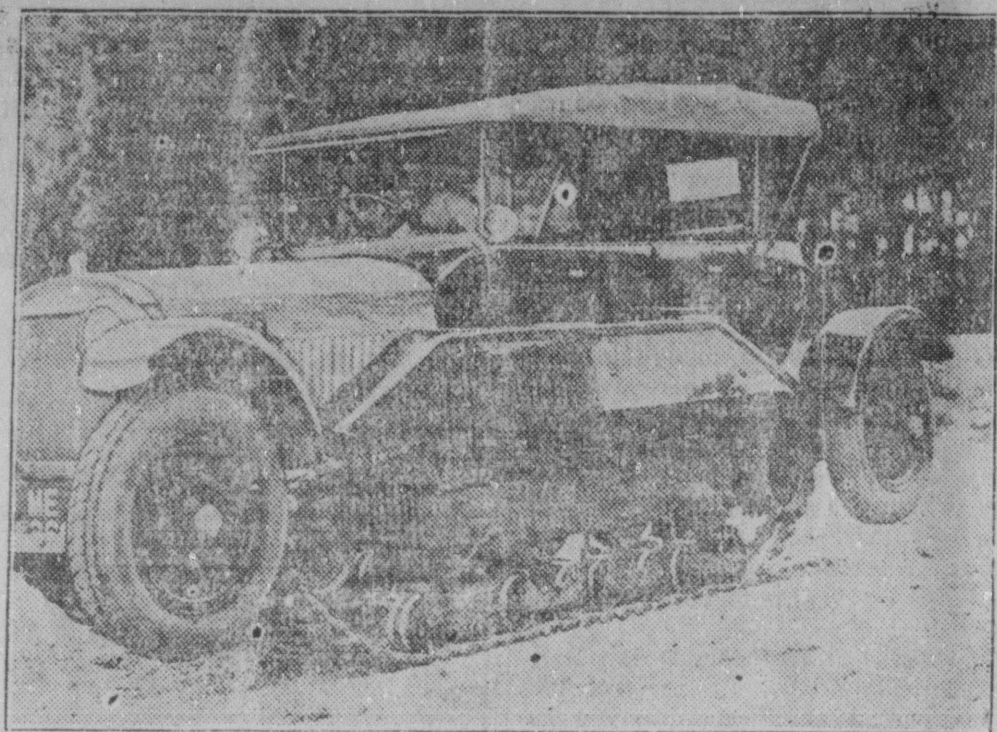

"Why, Buddy, you don't mean your father and mother are not getting along?"

"Sure they do! But daddy's getting bald!"

"Clip" Made Trouble

A cook in Rockland, Maine, shaved his head and bumped into trouble right away. Being in such close proximity to the penitentiary at Thomaston, he was arrested on suspicion of being an escaped convict. He had much difficulty in convincing the police that he had merely removed his hair to avoid getting grease into it when he was frying food.

AUTO-TRACTOR LATEST IN TRANSPORTATION

The latest vehicle for army transportation is the convertible automobile-tractor, which was demonstrated by the British war office. The experimental car, a reconnaissance, has a lengthy chassis and between the front and rear wheels is a tractor which can be lowered or raised at will, depending upon the topography of the land.

MOTOR JAUNT IS ONE OF DELIGHT

Have Car Overhauled, Brakes Properly Adjusted and Tires Inspected.

Vacations remind me of our two weeks' motor trip to Estes park last summer, and I remember how we planned what to take and what to leave at home. It's a problem. Some tourists take dogs, canaries, even victrolas. But on a camping trip, you want to forget some marks of civilization, says Aunt Aggie of the Kansas State Agricultural State college.

Perhaps the experiences we had in selecting things to take will help some would-be campers.

Things to Get.

First, get a waterproof tent—try the hose on it before you leave home to be sure it won't leak. A wall tent, or one that goes over the car, is satisfactory. Steel stakes are better than wooden.

We took a steel spring auto bed, but although it was comfortable, it was too heavy to handle. A bed with woven rope bottom and wooden supports rather than steel is better for an auto bed. Take a folding cot apiece for the rest of the family. You'll need plenty of warm comfortables—newspapers help out because they are good insulators.

We took as few clothes as possible and packed them in some old suitcases—new bags would have been ruined on that trip. We wore hiking clothes.

A short-handled spade helped us out of mud holes, and an ax was always useful. If you plan to fish, take your fishing tackle.

Cooking Utensils.

For meals, we had a small aluminum pan apiece, unbreakable cups, forks and spoons apiece, two or three case knives, a good butcher knife, a sirup pail for making coffee or heating water, a gallon pail for carrying water, salt and pepper shakers, skillet, and a large spoon for stirring. We took along a home-cured ham and saved a number of meat bills.

One of the children kept a notebook of expenses, and immediately after we bought anything—gas, oil, food—she recorded the amount. It cost us just \$150 for six of us to take the trip, and of course we have all our camp goods left to take another jaunt.

Our expense keeper also kept a diary of the trip in her notebook and, with our snapshots, we live over again our experiences.

Before leaving, have the car thoroughly overhauled, brakes adjusted, and a good set of tires put on, with a spare. A half-gallon can of oil is enough for emergencies. If you want to, take a trailer to pack things into, but one car is much easier to manage than two, even if the one is crowded.

Car Greatest Necessity for the Wife of Farmer

The American farm housewife can get along without a lot of things, but she must have her automobile.

Running water in the kitchen, a telephone and a radio are regarded as necessities, but the motor car ranks first.

The General Federation of Women's Clubs has announced that replies to 40,000 questionnaires sent to housewives living on farms disclosed that nearly four-fifths of them have automobiles, one-fifth radio sets, more than a third have running or pumped water at kitchen sinks.

Top of Steering Gear

Post Repays Lubricant

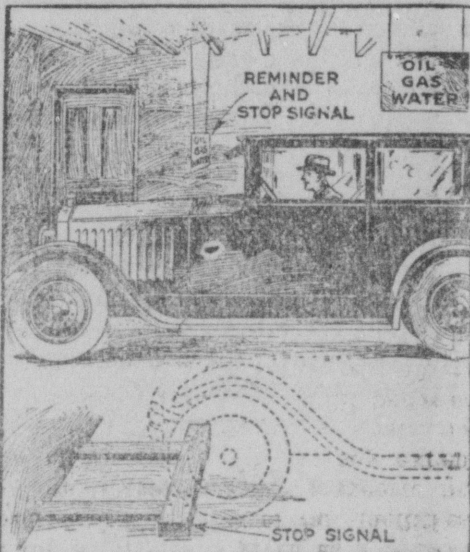

It pays to keep in mind many of the less conspicuous parts of the car which are not properly lubricated because they are overlooked so easily.

One of these, almost invariably forgotten in the lubricating process, is the top of the steering gear post. A few drops of light oil applied at this point every few thousand miles will take away the grinding noise when one tugs at the wheel as in parking.

Clutch and brake pedal shafts need a little lubricant once in a while. Neglect causes excessive wear, resulting in noisy pedal action.

Two Plans for Stopping Car in Right Position

The usual garage is just large enough to accommodate one, two or three cars, and the space in front of and behind the cars is rather limited. To prevent running the car into the garage too far, one owner suspended a card from the ceiling, so that it would just touch the windshield when

Handy Methods of Stopping a Car in the Correct Position in a Garage.

the car was in the right position. Another method of preventing the car from going too far is to provide a removable wooden bumper on the floor as shown in the lower sketch.—G. A. Luers, Washington, D. C., in Popular Mechanics Magazine.

Australia Is Big Buyer of Heavy-Duty Trucks

Australia is the largest purchaser of American-made heavy-duty trucks, contrary to the public belief that Canada imports more of that type of vehicles than any other country. This is due, perhaps, to its nearness but the facts, do not bear it out.

Last year, according to the government figures, 647 trucks of more than two and a half tons capacity were imported from the United States by Australia. The agricultural development of the Antipodes is given as a reason, together with a lack of rail facilities. As a matter of fact, truck experts believe, there never will be any extensive rail development in Australia, modern highways being built between the important cities which will afford ample transportation routes for the heavy trucks that also serve the rich farming districts that lie between.

Canada imported a little more than a third of the number of heavy-duty trucks that Australia did, the total for the neighboring country being 271.

AUTOMOBILE NOTES

What the world needs now is an automobile that will carry its own parking place.

Automobile drivers are getting their brakes tested for nothing, but pedestrians are still paying to have their eyes tested.

Some of our ancestors left footprints on the sands of time, but you can't do much with a rubber tire on a concrete pavement.

A large proportion of "blowouts" of tires are due to rim cuts, and these are caused by not keeping rims free from rust and grit.

To start an engine when the ignition is locked and the key is lost, run a wire from the underground side of the horn to the ignition coil.

The average worker gets \$2,000 a year, we read in a reliable journal. Of which, we would say, the average automobile dealer always gets some thing.

One person is struck by an automobile in this country every 42 seconds, a government statistic says. Once upon a time our national sport was baseball.

While a car may seem to ride better at 40 miles an hour than at 30 over a rough road, the higher speed sacrifices longevity and efficiency of axles, wheels, wheel bearings, differential, steering rods, brakes and other important parts below the springs.

Our Millionaire Cabinet

There are at least five millionaires in the present cabinet. They are Secretary of the Treasury Mellon, Secretary of Commerce Hoover, Secretary of State Kellogg, Secretary of Labor Davis, and Secretary of the Interior Work. Their wealth rating probably corresponds to the order in which their names are given.

They Certainly Do

Examiner—The farmers raise the grain; now what do the grain merchants do?

Boy—They raise the price.—Paris Rire.

Ask Any Housewife

Pepper—What's a cockroach anyway?

Salte—Well, it's a—er—sort of marine bedbug.

IRISH MUSSOLINI IS ASSASSINATED

KEVIN O'HIGGINS LEADER AND MINISTER OF JUSTICE

Killed On Way To Mass Sunday By Personal Enemies—Was unflinching As An Officer—Was Strong Man of the Free States—Forgives Killers With Last Breath—Brought Death On Himself By His Iron Nerve.

Kevin O'Higgins, known as "the strong man" of the Irish Free States was shot down in the streets of Dublin, Ireland, Sunday, and killed by assassins.

As in the case of another "strong man," Michael Collins, his murderers lay in wait for him and as he walked alone for his home to Black Rock, a short distance from Dublin, to mid-day mass, an automobile pulled up beside him and three men pumped bullets into him.

The assassins drove away and thus far have escaped police.

As he lay on the road mortally wounded, O'Higgins, vice president of the Free State council minister of justice and foreign affairs, gasped out: "I forgive them all."

Nothing could be done to staunch the flow of blood streaming from half a dozen wounds. Four bullets had pierced his neck, one his chest and another the base of his brain.

The sorely wounded man regained consciousness and to those about him said: "I am dying at peace with my enemies. I die for my country, I go to join Michael Collins."

Mr. O'Higgins usually was accompanied by a detective, but Sunday when starting for the Booterstown Catholic church for mass, he told his escort for the first time in three years to remain at home.

He was taken entirely by surprise when attacked.

The first shot struck him in the abdomen, but he managed to stagger across the road, where he collapsed. His assailants fired five or more other bullets into his head and body before springing into their car and driving furiously away.

The first to reach the wounded minister were Eamon Fleming, an official of the ministry of finance, his brother, and Professor John MacNeill, former minister of education.

Fleming raised his head, and Kevin whispered huskily: "They've got me, just as they got my father," and later "I forgive them. I die at peace with my enemies and my God."

Turning to Professor MacNeill, he said: "There is no hope. I want to dictate my will."

MacNeill knelt on the blood stained footpath and in a clear voice O'Higgins dictated his will, leaving everything he possessed to his wife and baby daughter.

The best surgeons in Dublin were summoned to his home, where he was taken, but they could do nothing to save his life. Despite his terrible wounds, his mind remained clear to

the end, and the doctors marveled at his vitality. He embraced his wife and child, and said farewell to scores of friends.

"Kevin, while there's life, there's hope," one of them said encouragingly.

"Ah! There is no hope," the minister declared in his old cynical manner. "But I was always a bit of a diehard."

Kevin O'Higgins was known as the Irish Mussolini because of the strong measures he adopted for suppressing the Republican attempt to smash the free state for force of arms.

He was probably the most respected and at the same time the most hated man in Ireland. A nephew of Governor Tim Healy, he shared the governor's gift of incisive and bitter speech.

A particularly touching coincidence is that his assassination follows upon the similar fate of his father, Dr. O'Higgins, who was shot dead by armed riders in his own home in 1923.

DESERVED PROMOTION.

John S. Morris, of East Franklin street, and in the employ of the Norfolk and Western railroad, has been made car foreman of the company at Winston-Salem, North Carolina, and will move, with his family to that city. While the many friends here of Mr. Morris and his family regret the fact that they are leaving Circleville, yet they are pleased to know that he has received the recognition he merits and their best wishes follow them in their new home.

WROTE BEST ESSAY

Miss Rose Gertrude Schmidt of Moccasin, N. J., whose essay entitled the "Meat Parade" won for her a university scholarship and \$150 in cash as national champion of the fourth national meat story contest which has just come to a close in high schools of the United States. Announcement of the winners was made by the National Live Stock and Meat Board, sponsor of the contest, after selections had been made by a committee of prominent home economics women. Nearly 14,000 girls competed in the contest.

EASTERN STAR PICNIC.

The O. E. S. will hold a picnic on Mrs. Patton's lawn July 12, between 6 and 7 o'clock. All Stars and their families are requested to attend and bring sandwiches sufficient for their own family and one buffet dish and also dishes and silver for each member of the family.

All-Powerful Custom

Custom is a powerful weapon of ridicule. A man who eats four meals a day has as much right to that number as the man who eats three—yet the world laughs at him.—Exchange.

Self-Denial

Teach self-denial, and make its practice pleasurable, and you create for the world a destiny more sublime than ever issued from the brain of the wildest dreamer.—Sir Walter Scott.

Editors and Their Wives Call on the Coolidges

Several hundred members of the National Editorial association and their wives, making a trip through the Black Hills, called on President and Mrs. Coolidge at the summer White House, the President is seen above chatting and shaking hands with his guests.

HAPPENINGS IN OUR STATE

**Taken Direct From Wires
By Correspondents of the
United States Press
Association.**

Bucyrus—John E. Hopley, 77, formerly in the U. S. consular service and prominent in Ohio political circles a quarter century ago, died at his home Sunday. Funeral services Wednesday afternoon.

Hamilton—Cracked walls at the office of the Indiana Refining company branch here today gave evidence of the force of an explosion which robbers tried in vain to open a safe containing more than \$200. Neighbors who heard the traffic blast investigated but the bandits fled while the investigators dressed. Concrete two feet thick in which the safe was imbedded was blown away. Windows were shattered and frames loosened.

Toledo—The \$20,000 races, a trotting and a pacing event, were on this week's program for the initial meeting of the grand circuit harness racing season, opening today. The class 8 Page Dairy pace on Tuesday will carry prices of \$20,000 and the class 10 hotel trot on Thursday will be worth a like amount.

Cleveland—The hunt for Cleveland's "smoked" robber widened Monday to all of northern Ohio.

Oxford—Shortly after he arrived at his laboratory yesterday Dr. Bruce Fink, professor of botany at Miami university was found dead in his chair by his assistant. Physicians pronounced death due to heart disease.

Pomeroy—Altho slide rock still was falling today, W. McCrossa, city engineer, said he believed the landslide along the Ohio river between here and Middleport was ended. The slide started Friday and forced motorists to detour from state highway route No. 7, which was closed pending arrival today of state highway officials.

Raising a Doubt

Why are we always demanding that people get out of a rut they are in? When a locomotive jumps the track and kills a lot of people it gets out of its rut.—Atchison Globe.

Tip to Hosts

You can make any man feel at home by starting an argument.—Rotland Herald.

ASHLAND, KY. PEOPLE MEET WITH ACCIDENT

**Sunday Afternoon at Crooked Bridge, Columbus Pike
---Girl Injured.**

Returning home from a visit to relatives at Marion Sunday afternoon Emery Smith, of Ashland, Kentucky, driving a Ford sedan, was side swiped on the Crooked bridge north of South Bloomfield by a Ford coupe bearing license No. 954539 going north. The two cars met on the bridge which as its name implies is in a crooked line of the road and crosses the Bulen ditch at this point.

The car of Mr. Smith turned over several times and it was a wonder no one in the car was killed as the top of the machine was crushed. With Mr. Smith were his wife, Orville Gard, a nephew and Emmadelle Berry, a niece. They were brought to this city and were taken to the home of Judge I. N. Abernethy, by Mr. and Mrs. L. F. BeVier, of Columbus, who came up just after the accident occurred. Miss Mary BeVier stopped her machine within a few feet of the two wrecked machines. She had her car under control or there would have been a third wreck to chronicle.

Mr. Smith received a severe shock. His wife was bruised considerably and their little niece sustained a colosse fracture of her left wrist. Dr. Howard Jones attended to their injuries and they returned to their home in a bus. Their car was brought in by The Circleville Motors company.

Hoboes Fatten on Good Nature of Housewives

New Britain, Conn.—Any good hobo with a hard-luck story can make from \$12 to \$15 a day, in the opinion of Prof. W. B. Bailey, formerly of Yale, who lived the life of a tramp three summers and then for ten years conducted a hobo's lodging-house. "Thanks to the American housewife, the easiest thing a tramp does is to eat," he said in telling of his experiences at a Rotary club's dinner. "The only objection he has to the American housewife is that she insists on feeding him cake and pie when what he wants is a slice of meat between two pieces of bread."

Telephone's Beginning

In 1875 the first words were transmitted by telephone, but the first complete sentence was not transmitted until 1876.

CHURCH NICNIC.

More than seventy members and friends of the Church of the Brethren picnicked in May's woods last Saturday afternoon.

The principal thing on such occasions is the "eats," and that was good, better, best to the nth. degree. But that was not all for the recreation feature was equally grand. Then came the musical program which made the stately old shade trees fairly clap their hands with joy in concert with the happy voices of childhood roseate youth and old age.

The cornet solos of Charles Essick, superintendent of the Sunday school and recreations and readings by others were highly complimented.

Some took pictures, others posed while the same or others took a hike, but all went merry as a marriage bell.

HIS BRITISH CROSS

This is the British Air Force cross which was presented to Colonel Lindbergh by King George in London.

SOCIAL CALENDAR

Mr. and Mrs. Frank Neff, of Pheroson entertained to dinner Sunday. Covers were laid for Mr. and Mrs. O. P. Bentley, of this city, Mr. and Mrs. George Neff of Lancaster and Edgar Ebert of Columbus.

American Flag in England

In 1918 the United States flag was formally placed in St. Paul's cathedral in London, England. It was presented by a party of American soldiers serving in the Canadian army during the World war.

Black Flowers Unknown

There are no black flowers, but the ones nearest to black are very dark tulips which are called black. There are very dark pansies also that seem almost black.

E. D. OVERLY KILLS SELF WITH SHOTGUN

**Remains Found Near Home
of Son at Bexley Friday--
Burial at Kingston.**

With his head nearly torn away, the body of Ervin D. Overly, aged 78, Grove avenue, Bexley, who ended his life by shooting himself with a shotgun, Friday, was found about 75 yards from his home Saturday morning.

The aged man, who threatened Friday afternoon to take his life, because he was despondent over things in general, had placed the shotgun so that the bullet penetrated his neck under his chin when he pulled the trigger.

When he failed to come home a search was made for him and his body was found in a wooded section not far from the family residence, where he made his home with his son Wood N. Overly. It is believed he had hidden away the shotgun in the vicinity where he committed the act, as it had been missing from the house for several days.

Mr. Overly, who was a retired plasterer and brick mason, had resided in Columbus for a number of years, but lived in Kingston and near that place prior to moving to Columbus. He was born near Kingston, the son of pioneer residents in that neighborhood. Overly Chapel, Ohio, was named for his grandfather.

Surviving him besides his son Wood with whom he resided, and who discovered his body Saturday morning, are his wife; three other sons, William, of Bidwell, Ohio, Charles D. of Cedarhurst and Otis Overly of Vinton, Ohio; four daughters, Mrs. Lydia Neal, of 2162 Margaret avenue, Shepard, with whom the wife of the deceased resided, Mrs. Catherine Worthen, of Wellston; Mrs. Laura Romer and Miss Bessie Overly of Columbus; two sisters and a number of grandchildren and great-grandchildren.

Funeral services at 9 o'clock Tuesday from Edward E. Fisher Co., chapel. Burial in Kingston.

From the Records of the
Various County
Offices.**

Marriage License

George H. Betts, 24, Williamsport, farmer, Frances Strobe, 24, Atlanta. Rev. Franklin McElfresh.

KIRKWOOD REUNION

The fourth annual reunion of the descendants of George and Sallie Williams Kirkwood was held Sunday July 10, at Rising park, Lancaster. Twenty-nine members and friends of the family were present. Those attending from Circleville were Miss Anna Kirkwood, Mr. and Mrs. Charles B. Stoffer and son, Thomas Willard, Mr. and Mrs. Montford Kirkwood and children, Lucile and Montford Jr., Mr. and Mrs. Lowell Brown and children, Betty, Jack and Rosemary and Mr. and Mrs. Earl Huffer.

Wren's Sweet Song

While Jenny Wren is incubating, her mate perches nearby, untiringly warbling his sweet song, says Nature Magazine. After the young are hatched there is little rest for either of them. Caterpillars, beetles, bugs and spiders must be supplied in astonishing numbers all the time, until the youthful wrens are ready to help in the hunt.

Keeping Up

It isn't the payments for upkeep that are the deterrents; it is keeping up the payments.—Wall Street Journal.

BIRTHS

To Mr. and Mrs. Merle Barnhart, South Court street, Monday, July 11, 1927, a son.

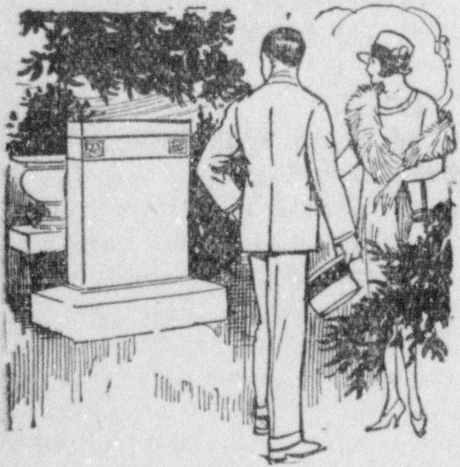

To Mr. and Mrs. James Thacher, of Columbus, at St. Ann's hospital, Friday, July 8, 1927, a daughter. Mr. Thacher is a son of Mrs. E. S. Thacher Sr.

Classed Under Head
of Expected Events

"What was coming off at yore house last night, Gap?" asked a resident of the Rumpus Ridge region. "Nuth'n special," replied Gap Johnson. "That is, except I'd invited a passel of kinfolks over to sorter help me celebrate my birthday. Wife's maw was there and several of wife's brothers and sisters and their families and such like, and a bunch of my kin, and some of the neighbors, and a feller or two that figgered there mought be a little ficker handy. Nuth'n' perlicker happened—nuth'n' but what commonly occurs when a feller celebrates his birthday; I whipped three, four of the guests enduring of the evening, and a bunch of 'em teamed up and whaled me. Outside of that there wasn't noth'n' strange came off and I d'know as you'd call them things strange under the circumstances."—Kansas City Star.

RECORD TRACK
LAYING FEAT

Performed By Sturm & Dillard
on Chesapeake & Hocking
Railway.

Contractors Sturm & Dillard Friday laid 1 1/4 miles of single track on the Pickaway township Chesapeake & Hocking Railway right-of-way; when it is considered that these steel rails weigh 130 pounds to the foot it is a remarkable feat of engineering skill; to enable them to do that amount of work the Contractors used two tractors leased of Wesley Justice of this city, to drag the heavy rails ahead of the steel gang.

Sturm & Dillard's contract for steel laying extends as far south as the viaduct that crosses the Scioto Trail at the Samuel Boggs farm.

By tomorrow the single track will be completed as far as the Scioto creek bridge and early next week The Bessmer Steel Co. will begin work on that bridge.

MAN WITH HOLE
IN HEAD WILL LIVE

Hammond, Ind., July 8.—(UP).—The man shot through the head with a steel bar 24 feet long had lived 12 days today and his physician was confident he would get well.

Paul Kosty, who is 37 years old and a foreman at the LaSalle steel plant in Hammond, was working over a mill planing bench when the accident occurred. He stooped to pick up a wrench. The steel bar, 24 feet long and three-quarters of an inch in diameter, flew from the machine which held it and struck Kosty on the left side of the jaw.

Kosty has a hole in his head 3/4 of an inch in diameter from the left side of the jaw to just below the right temple as a result of the accident.

AGREEMENT

Mr. Murphy was taking his first flight in an airplane. The pilot was taking him over San Francisco and when they were about 3,000 feet up the plane went into a nose dive. "I'll bet 50 per cent of the people down there thought we were falling," the pilot remarked. "Sure," answered Mr. Murphy, "and I know danged well 50 per cent of the people up here thought so, too."—Success.

Seasoned Right to the Second
"Bridget! What in the world is my wrist watch doing in the soup?" "Shure, mum, ye towld me ter put a little toime in it an' that's the lit-tlest wan Oi cud foind!"—Progressive Grocer.

DIDN'T DRESS SWELL

Mary—Does he dress well?
Alice—Dress swell? I should say not! His wife does all the swell dressing in that house.

Landing a Passenger

Ruth rode in my new cycle car
In the seat in back of me;
I took a bump at fifty-five,
And rode on ruthlessly.

What's in a Name?

"My niece is quite theatrical," remarked old Mrs. Blunderby. "Next week she is taking part in a Shakespeare play at college." "Which of his plays is it?" her caller asked. "Edith mentioned the name of it, but I'm not sure whether it's 'If You Like It That Way' or 'Nothing Much Doing.'"

Mental Control

"The next thing, I suppose," growled Mr. Grump, who thought his liberties were being tampered with, "they'll be controlling a man's thoughts by government edict." "They're doing that now indirectly," answered his companion. "I spend most of my time thinking about how I'm going to pay my taxes."

Peroration

An imported orator was thundering against a candidate for justice of the peace. "Upon what meat does this, our Caesar feed?" he demanded. "I'm a vegetarian," piped up the somewhat frightened candidate. That seemed to settle that.

MIGHT GET STUCK

"She has sharp ears."
"Avoid whispering in them then—you might get stuck."

One Male Job They Shy At

'Mong wonders that
You'll find are missin'
Are women who
Will gladly listen.

The Wrong Store

Sammy—My father's a rabbi and he wants to stop a pain in his temple. Hardware Clerk—Oh, you want some putty. How much? Sammy—No, I want aspirin. I thought this was a drug store.—Good Hardware.

Squaring Up

"Jim, I borrowed a book from you ten years ago."
"Well?"
"Here it is and an old magazine for interest."

Enough Said

Finnigan—And what did the phrenologist say the bumps of your head denoted?
Hooligan—That my wife was a very impulsive woman and easily irritated.

Proverb Modernized

"Is Clare much put out at being jilted by that young aviator?"
"Oh, no. She says there are just as good birds in the air as ever were caught."

A La Mode

Customer—I want a smart dance frock.
Saleswoman—Certainly, madam. I've a thing that would suit you down to the—er—knees.

PLAN HIGHWAY
OF 2,275 MILES

Concrete Roadway From
Chicago to Los Angeles
Is Contemplated.

Chicago.—A concrete highway from Chicago to Los Angeles will link the corn fields of the Middle West with the oil regions and fruit lands of the Pacific. This is the plan of the recently formed United States Highway 66 association, which visualizes a "Main Street of America," that will serve both as a commercial and a military highway. Travel time between the two points will be reduced by several days, it is expected.

This pavement will be about 2,275 miles long and the width in heavily traveled sections will be as much as 40 feet. The mapped-out route is 200 miles shorter than any other highway or railroad between Chicago and Los Angeles and when finished the trip may be made comfortably in eight or nine days.

United States Highway 66, its official name, follows established main roadways as much as possible. In Illinois, for instance, the route follows the 275-mile paved highway from Chicago to St. Louis. However, in the interest of shortened travel United States Highway 66 breaks to the southwest from the Billionarea to Springfield and Joplin, even though a 250-mile stretch of concrete now extends westward from St. Louis to Kansas City. About half of the highway is paved from St. Louis to Joplin.

Expect Co-operation.

From Joplin on there is very little paving, but through the centralized organization highway authorities are certain that the co-operation between county, state and federal government road builders will bring about an early completion of this concrete ribbon.

The route extends to Tulsa, Oklahoma City and Texola from Joplin and then touches an oil region of upper Texas. The roadway then passes on to mysterious Santa Fe, N. M. and from there to Albuquerque, which hardly anybody can spell, and on to Gallup, made famous by eastern scenario and magazine writers who have been there.

Holbrook, Flagstaff and Needles are high spots on the thoroughfare through the tombstone and cactus state of Arizona. The Rocky mountains are crossed without encountering any dangerous passes, welcome

news for prospective tourists from the Great Plains. The roadway then drops down to San Bernardino, Calif., and Los Angeles is but a short journey away.

Permanent Organization.

The United States Highway 66 association is a permanent organization formed by chambers of commerce and automobile clubs, representatives and state officials from the Middle West to the Pacific coast. John T. Woodruff of Springfield, Mo., president of the association, has been engaged in both railroad and highway development work as an attorney and an engineer. Mr. Woodruff assisted in revolutionizing highway building in his state.

"A great highway," declares Mr. Woodruff, "cannot be worth its purpose unless, like a trunk-line railway, it connects our centers of population, taps our rich agricultural and mining regions and presages expansion for millions of young citizens in undeveloped territories. United States Highway 66, in my opinion, does all of that and more; it will, by every token, become America's 'Main Street' in reality as well as name."

Special Outfit Saves
Fallen Totem Poles

Vancouver, B. C.—The dominion government totem pole preservation outfit has arrived at Skeena Crossing, B. C., with a flat car load of hoisting gear including the huge derrick used for erecting fallen poles. This gear came from the totem pole village of Kitwanga, where the government work of totem pole preservation was carried on during the last two seasons to the great interest of the tourists who are allowed to walk through the Githsan Indian village while the trains stop for water.

This year the work of totem pole preservation will be carried on at Gytsegynela, a village about a mile below Skeena Crossing, where there are 18 huge totem poles close to the river bank plainly seen from the railroad car windows for over half a mile on the opposite side of the Skeena river.

The northern end of the Pacific highway is at present within four miles of Gytsegynela so that automobile parties from many parts of the United States can now come close to this remarkable collection of totem poles and in a few weeks the road gang will resume work on the highway and push it on past Skeena Crossing, Gytsegynela and well toward Kitwanga during the present season.

Sprinter's Stride

The average stride of a sprinter is from 7 feet 6 inches to 8 feet.

POLLUTED SCIOTO

Editor Ohio State Journal:

Your editorial, "Boating On the Dams," in this morning's State Journal, I have just read with mingled emotions, as I do many of your excellent editorials.

As an interested reader permit me to suggest that you write something about the beauties of the Scioto River south of Columbus during the hot months of July and August. You might dilate upon the wonderful green tints of its stagnant water and the various perfumes which arise therefrom. For the benefit of timid boatmen or waders you might mention that not even crayfish or turtles inhabit the stream and that no "great depth of water" must be "constantly kept in mind."

I am sure it would be eminently proper for you, interested as you are in all the citizens of this state to suggest to the state board of health that it take a day off and picnic on the bank of the Scioto south of Columbus below the point of entrance of the water which is first illegally impounded above Columbus and, after flushing the sewers of your growing city, then is turned into the river below your city.

If the state board of health ever takes the initiative in any matter of state hygiene, such an outing might produce action. I feel sure the state board of health would not enjoy such a lunch any place in Pickaway County during the heated months of summer and fall.

Please get up a little party of your friends and visit this once beautiful river south of Columbus and then give us your honest editorial opinion of the crime which our capital city is committing by impounding the water of the Scioto and then emptying her sewage into the diminished stream, polluting it for unnumbered miles, which were once the playground and fishing resort of citizens south of your "rapidly growing city"—a city so selfish that it boasts of miles of fine water "as enticing as any in the state."

HOWARD JONES.

Circleville, O., July 4.

A Seasoned, Conservative Security

THE BUCKEYE'S 5% Certificates of Deposit; \$50 to \$100,000

Interest from date of issue, mailed semi-annually, or compounded with the principal, if desired.

Renewals unnecessary; interest certain and principal when wanted, and always at full face value.

An excellent investment for those with a few hundred or few thousand dollars, where absolute safety is assured.

THE BUCKEYE is known for its conservatism, stability and soundness. It has over 75,000 customers; resources over \$35,000,000 and a reserve of \$1,500,000 for the sole protection of investors.

THE FARMER ISN'T ALONE

Farming is hard work. The returns are often slight. There is a tendency for farmers to feel discouraged at times.

But take heart. Farmers in this district are never alone. They always have a partner in this bank.

We are interested in their problems and endeavor to be sympathetic and helpful at all times.

VALUE OF LIME

In Chick Ration Has Been Fully Demonstrated.

If chick rations are adequately supplied with lime and phosphorus, will additional amounts of lime prove beneficial or harmful? The value of lime and phosphorus in the ration of the growing chick has been fully demonstrated, says R. M. Bethke, animal nutrition specialist at the Ohio Agricultural Experiment Station, in answering this question.

Dr. Bethke's experiments show that the amounts of lime and phosphorus necessary in the ration to protect against leg weakness vary inversely with the amounts of the anti-rachitic factor supplied the chick. Within certain limits the more lime and phosphorus present in the feed mixture the less the amount of cod-liver oil or ultra violet light required. Or in other words, the greater the anti-rachitic factor the lesser the need of lime and phosphorus.

Several recent experiments on young chicks showed that excessive amounts of lime were harmful. Lime in the calcium carbonate, limestone, or oyster shells in amounts of 4 to 5 percent in addition to rations containing cod-liver oil and 5 percent bone meal caused slower and more uneven growth and increased mortality. Amounts of around 2 per cent of lime in these rations proved beneficial.

Old Political Gathering

The first national convention of workmen as a political party or group, at New York, nominated for President, U. S. Grant, and for Vice President, Henry Wilson on May 23, 1872. These were the regular Republican candidates.

Methods Used to Control Yellows

Disease of Cabbage Is Caused by a Fungus Which Persists in Soil.

(Prepared by the United States Department of Agriculture.)

Yellows of cabbage, through injury to the fibrous root system, stunts the plants, giving them a lifeless, yellowish green color. It may usually be noticed in two to four weeks after transplanting, but may appear in the seed bed. Yellows is caused by a fungus which persists in the soil for many years. The disease greatly retards the growth of the plants, death resulting, in the worse cases, within two weeks or so after transplanting. Most of the plants, however, continue a sickly existence for a month or more, and a few live through the summer, heading imperfectly.

Only Safety Plan.

While various methods are employed to control the yellows, the only safety lies either in planting the crop on disease-free land or in using only yellows-resistant varieties. The Volga and Houser are the most resistant of the older domestic varieties. The Wisconsin Hollander is a disease-resistant selection from the standard winter variety Hollander, or Danish Ballhead, and should be planted wherever the late crop is grown on "yellows-sick" soil. All Seasons and Brunswick, two of the leading mid-season varieties used for sauerkraut, are now known in the trade as Wisconsin All Seasons and Wisconsin Brunswick, respectively.

Disinfection of Seed.

Disinfection of the seed reduces the danger of spreading the disease to new districts. Put the seed in a sack of a finely woven material, such as coarse cheesecloth, large enough to allow thorough agitation of the seed. Soak for 30 minutes in a solution composed of corrosive sublimate (mercuric chloride and water in the proportion of 1 to 1,000). This chemical can be obtained from drug stores in tablet form, the package containing directions for making up the solution. After soaking, thoroughly rinse in clean water, then split the sack and spread out seed in a thin layer to dry, stirring as necessary. Corrosive sublimate is a deadly poison, and both tablets and solution must be kept out of reach of children and farm animals.

Check Depredations of Different Garden Pests

Some insects are not fussy about their diet. They will devour almost any of the vegetables. Of this type are cutworms, plant lice, flea beetles. But the leaf hopper dines chiefly upon potatoes, tomatoes, strawberries and beans. A nicotine sulphate or dust will control this pest, and also plant lice.

Favorite foods of the flea beetle are radishes, cabbages, turnips, tomatoes, potatoes and eggplants. This pest usually feeds on the underside of the leaves, and can best be destroyed with nicotine dust or bordeaux mixture. About the only way to check the depredations of those bandits, the cutworm and the grasshopper, is with a poisoned bran mash.

Asparagus has a beetle of its own. Spraying from both sides with lead arsenate will put a quietus upon this red, black and yellow feeder; also upon the Colorado potato beetle, the tortoise beetle, which attacks the sweet potato; the horn worm and fruit worm, which are the tomato's chief foes, and the worst enemies of the plebeian but necessary cabbage—the cabbage worm and cabbage looper.

Sudan Grass Is Favored for Live-Stock Pasture

Sudan grass has proved to be the most satisfactory summer pasture for all classes of live stock in Kansas, according to the report of L. E. Call, dean of the division of agriculture at the Kansas State Agricultural college and director of the Kansas experiment station. It retains its succulence in dry weather and withstands drought better than any other pasture crop under observation by the experiment station.

Sweet clover is less valuable for hogs than alfalfa but is satisfactory for cattle and sheep.

Orchard grass has proved to be one of the most satisfactory permanent pasture grasses. It is easy to start, stands grazing well, and all classes of live stock relish it throughout the entire grazing season.

Agricultural Facts

Forcing yields up forces costs down

Honey bees seldom live more than six weeks.

Every farmer who does not keep his soil built up should be run down for robbery.

Labor-saving equipment is the broom that helps to sweep drudgery out of farm homes.

Farmers have equally as good scientists doing research work for them as does industry. The point wherein the farmers or agriculture fall short is that it does not have the executive power with which to put into effect the results of experimental work.

THROCKMORTON SUGGESTS FOUR YEAR TERM

Cedar Point, July 8.—(UP.)—Prof. A. H. Throckmorton, Western Reserve University, today urged the Ohio State Bar Association to get behind a constitutional amendment to provide four-year terms for the governor and all elected state officers.

"Make the term of office four years and forbid re-election," Throckmorton told the delegates here, "and you'll have a much better government."

"Four years will give the governor time to work out his policies and at the same time the prohibition of more than one term will take away his incentive to 'play politics' and build a machine for re-election purposes."

He advised against the calling of another constitutional convention in 1932 on the grounds that it was not needed.

California Coed Wants to Fly to Honolulu

San Francisco.—The realm of transoceanic flyers, which thus far has belonged exclusively to man, is threatened with an invasion of the fair sex.

With two women already making plans to fly over the Pacific as fellow adventurers with the men who will pilot the planes, a coed at the University of California recently appeared with an offer to accompany any Pacific flyer who would take her along as a companion. She is Miss Rose Anderson.

The two who are making definite plans for flights are Miss Mildred Doran of Flint, Mich., who expects to take passage with Augie Peddler, Michigan aviator, who has entered for the mainland-to-Honolulu flight, and a woman who has made plans to fly from Dallas to Hongkong.

In Oil Probe—Cecil B. De Mille Charged With Usury In Julian Pete Scandal.

Los Angeles, July 8.—(UP.)—Cecil B. De Mille, motion picture producer, was charged with usury in a complaint issued today in connection with the Julian Petroleum Corporation crash.

The complaint was signed by E. J. Lickley, city prosecutor, and charged that the movie magnate received a \$12,000 bonus on a \$60,000 loan to the oil company which was wrecked several months ago.

De Mille's name was among a list of 100 individuals turned over by the district attorney to the city prosecutor when it was decided that indictments against them could not be obtained from the grand jury.

Wall Street Invests In Ultra-Violet Rays

Anton Schutz' etching of new Equitable Trust Company Building, first American skyscraper to utilize new glass for admitting sun's vital rays indoors.

IF ULTRA-VIOLET rays can produce more prosperous bankers and fairer stenographers, the thousand or more executives and employees of the Equitable Trust Company bid fair to become the envy of New York's financial district.

When they move into quarters in the company's new building, already towering above the familiar landmarks of Broad and Wall Streets, they will be working daily in an atmosphere that differs from that of neighboring offices by the presence of the vital rays of sunlight.

In his announcement, Lyman Rhoads, vice-president, states that, as a definite move to maintain the most healthful conditions for its personnel, the company will use vitaglass in the windows of eighteen floors of the building.

"We are told that our installation is the first instance in this country where a skyscraper office building will utilize the scientifically-established health benefit of the sun's vital rays," says Mr. Rhoads, "al-

though prominent London bankers are said to have been profiting from similar installations for some time.

"We know that office workers do not have enough opportunity to get out under the sun. We know that the most valuable part of the sun is excluded by ordinary window glass. Through this discovery by an English scientist, our company plans to bring the healthful ultra-violet rays of outdoor sunshine indoors for maintaining the physical welfare of our staff while they work.

"If the exigencies of business rob its men and women of natural physical advantages and if science perfects means for returning the stolen goods, it seems to us to be the duty of business to admit the theft and to make amends by accepting the contributions of science.

"If we were to view this move solely as an investment, on which we might expect a profitable return, we are confident that the vitaglassed windows of our new building would give us that return in a newly invigorated personnel and a lessened absentee list."

GOVERNMENT COSTS PEOPLE 11 BILLION DOLLARS YEARLY

Figures Represent the Aggregate Expenditures of Federal, State and Local Governments.

Washington.—The total cost of government in the United States for the fiscal year 1925 was \$11,124,000,000, compared to \$10,983,000,000 for 1924 and \$2,910,000,000 for 1913, according to the national industrial conference board, as announced recently. These figures are the aggregate expenditures of federal, state and local governments, and include capital outlays and debt requirements.

The increase over 1924 was despite a \$365,000,000 decrease in the federal government's disbursements. Federal expenses increased again in 1926, however.

"Although the federal government in 1925 succeeded in checking the rising tendency of its expenditures through a consistent policy of economy and judicious debt retirement there is little hope that departmental expenses can be much further reduced owing to the increasing demand for necessary public service of all kinds," said Magnus W. Alexander, president of the conference board. "State and local governments have generally followed exactly the opposite policy, spending more and more from year to year and borrowing whatever they needed to make up the discrepancy between tax collections and expenditures."

Local agencies in 1925 expended \$5,820,000,000, according to the board's figures, as against \$5,421,000,000 in 1924 and \$5,136,000,000 in 1923. State governments spent \$1,530,000,000 in 1925, \$1,441,000,000 in 1924 and \$1,244,000,000 in 1923. Federal expenditures for the fiscal year 1925 were \$3,765,000,000; for the two preceding years, \$4,121,000,000 and \$3,885,000,000. In 1926 they increased to \$3,936,000,000.

The increase in population has been more rapid than that of expenditures, however, so the per capita cost of government decreased slightly in 1925. The per capita expenditures in 1925, according to the board's computation, were \$96.14; for 1924, \$96.58; for 1923, \$91.90; for 1913, \$30.24.

Future Generations

Planting and raising trees for future generations are one of the activities of electric power companies of which few people hear. A single company in northern New York state planted 4,000,000 trees between 1914 and 1926 and expects to make the total 10,000,000 by 1930.

Million Miles Flown for Each Fatality in U. S.

Newark, N. J.—One can now fly more than 1,000,000 miles to the risk of a single fatality. This is the present situation in this country as established by the air-mail service and which is welcomed by those interested in commercial aviation enterprises. In the army and navy the distance flown to a fatality is about one-half that rate due to the greater inherent hazard called for by military requirements.

Hazards in commercial flying are rapidly diminishing in proportion to the distance traveled, as the area of operations expands. Is the preliminary conclusion of Dr. Frederick L. Hoffman, consulting statistician, Prudential Insurance company, who has for several years been investigating the situation. Doctor Hoffman last year made 14 flights himself, covering more than 2,500 miles of air distance. He is most enthusiastic in his anticipation for the future of flying, believing that in a few years flying will be as common on this side of the Atlantic as it is in Europe at the present time.

Doctor Hoffman is also of the opinion that recent legislation providing for the federal supervision of flying tends strongly in the direction of greater safety by providing for thorough inspection of all aircraft and periodical examination of pilots.

War Hero With Many Medals Asks for Job

Los Angeles, Calif.—An appeal to City Engineer Shaw to find in his department a position for Louis Van Iersel, said to have received more decorations than any man who served in the World War, was made by Dr. A. D. Houghton of the state committee of the hospital department, American Legion. Iersel, whose health was undermined during the war, formerly worked in the city survey department of the engineer's office.

Iersel has received medals from the King of England for life-saving at sea; the French Croix de Guerre for rescuing 16 wounded comrades; a second Croix de Guerre for capturing 63 Germans, five of them officers, during the battle of the Argonne; the Congressional Medal of Honor and the Medaille Militaire; the Italian War Cross; the War Cross of Montenegro, and life memberships in the American Legion and the Disabled Veterans of the World War. He also received the "Hero" medal of the Breakfast club recently.

A Thought for Today
Fortune is ever seen accompanying industry.—Goldsmith.

DEAN VIVIAN
DEFINES ACT
OF FARMING

This is the Only Industry in Which All the Family Live at the Plant.

Members of the French Academy, once decided to define "lobster." Having reached a conclusion, it was submitted to Cuvier, greatest of French naturalists for his approval. This is what they wrote, "A lobster is a red fish that swims backwards."

Cuvier replied; Gentlemen, your definition is admirable, with certain exceptions: The lobster is not a fish, it is not red and it does not swim backwards."

This is illustrative of the fact that it is no simple matter to give a definition which will bear expert analysis. Would you care, for instance, to submit a definition of "farming?" The question was submitted to Dean Alfred Vivian, of the Ohio State University, College of Agriculture. He is amply fortified to define the term. This is the definition he gave. It transcends dictionaries and agricultural journals.

"Farming is; first, a manufacturing business," he said; second, an art based on broad applications of all the natural sciences, of economics and sociology, and third, a mode of life.

"From a purely business angle, farming is a manufacturing activity, for the farmer, working in cooperation with nature, takes a few gases from the air, some minerals from the soil, and by a synthetic process manufactures them into complex products.

"It is easily demonstrated that all of the natural sciences; biology, physics, chemistry and the rest, have a bearing upon farming. Economics and sociology touch definitely upon farming, for the farmer has his own business to run and his own social contacts to maintain.

"As a mode of life, it is distinct. In America, at any rate, farming is peculiar in this one respect; it is the only industry in which the family lives right at the industrial plant. Farming, furthermore, is the only industry in which the whole family has a part."

And this is farming, according to the highest authority in Ohio.
George U. Marvin.

DO YOUR OWN THINKING.

For fifteen years, old Tom Smith had been running the pumping engine at Brown's Falls. For fifteen years, old Tom climbed up twelve feet on a ladder every day to squirt oil in a little hole in a valve-motion rock-shaft.

One day he slipped and nearly fell. The superintendent saw it, investigated and said: "What were you doing up there?"

"Shot a little oil into that hole up there."

"What hole?" returned the superintendent. Tom showed him.

"Why, man!" exclaimed the superintendent, "that's no oil hole; that's only a lathe center—what they turned the shaft on when they made it."

So it was. We all know how old Tom felt when he found out that the hole he had faithfully oiled so long was only a blind alley. That's the difference between men—some use their brains and some don't.

Did it ever occur to you that the man who needs much supervision pays for it? He certainly does. He pays the difference between what he might be getting and what he is getting for his work. The more you know and the more thinking you can do for your work, the more you are eventually going to be paid. Then, too, the more you know and the more thinking you can do for the boss, the sooner will he put you where you can supervise the work of others and be paid accordingly. Do your own thinking.

Cause for Exasperation

"What exasperates me more than anything else about the boobies who differ with and from me on politics, religion, the money question, the tariff, weather omens and the gulf toward which we are rapidly and inevitably drifting," said J. Fuller Gloom, the human hyena, "is that they are so infernally proud of their own idiocy."

Forest Fires in France

France has little forest land, and the serious losses last year from forest fires have created great concern. During the year there were 130 serious fires and the burned areas aggregated sixty square miles. The monetary loss is estimated at 16,000,000 francs.

Old English Institution

Walters in the Middle ages in England were a body of musicians kept by some great persons to announce the hours of the night. Many cities and towns also had their regular waits. After a time the name was transferred to persons who walked the streets about Christmas time singing Christmas hymns and carols.

POISONED DOG.

Somebody poisoned my dog today, Tho he never did anyone ill; And so he is thru with his canine play

And his waggly tail is still. No more shall I walk in the field with him

Along at my side to jag, And—I don't care if my eyes are dim

Somebody poisoned my dog.

He was homely, I know, as a dog could be, And only a mongrel, too; But I loved the old fellow and he loved me

As people and dogs may do. Nothing on earth could disturb his trust,

Or his love and faith befoeg, And now he lies here at my feet in the dust—

Somebody poisoned my dog.

I patted his head—and cried, For it isn't funny to lose a friend

From off this earthly cog, And he was loyal unto the end—

Somebody poisoned my dog.

I wonder how any one could have done

This poor little fellow harm; But here he lies—his race is run—

Tho his body's still soft and warm. My life is lived on a peaceful plan,

My pace is a quiet jog, But—I wish I could find the snake of a man

Who poisoned my little dog.

Historic Conference

The congress of Berlin was a conference of the European powers held in Berlin in 1878 at the conclusion of the Russo-Turkish war, and it concluded with the treaty of Berlin, which settled the affairs of Europe for a time. These conditions were changed by the treaty of Versailles in 1919, ending the World war.

Old Jewish Coinage

The gold talent of the Jews in ancient times was equal to 10,000 shekels; the silver talent to 3,000 shekels. The Jews did not possess coined money until after the Captivity, and the earliest allusions are to the coins of Persia.

Martha Christy,

6julyd3. 116 West Water Street.

Noiseless Screen Doors

The constant banging of a screen door in summer is unpleasant, and it is very hard on the door. It can be prevented by fastening one-inch pieces of felt or very thin pieces of cork on the part of the door-frame where the door strikes. They may be nailed on, but are best glued, and when glued will remain in place a long time. There should be one piece near the top of the door and another near the bottom.

This applies also to any other door and to cupboard or bookcase doors.

Took Name From Goddess

The term "cereal" is derived from Ceres, the goddess of Agriculture.

SALE

As I am moving into smaller property and have an excess of household goods consisting of rugs, extension table and chairs, kitchen cabinet rockers, porch furniture and other numerous articles, I will offer same at public auction Saturday, July 16, at 2 o'clock at the Dresbach residence, 464 East Main street, Circleville, Ohio.

CIRCLE CITY DAIRY

FOLKSBURG ITEMS

The hot weather has sort of sapped us of our vitality this past week and left us contented not to disturb things much. And, maybe some of the readers know the feeling, like as for instance, you half way make up your mind to fix a screen door that won't stay shut, and then you remember you'd have to walk out thru the sun to the woodshed for a hammer, and you just let it go.

But, outside of ourselves, things in Folksburg are stirring along right lively. And, somebody just remarked that there's not much sale for the fly swatters any more, on account of fly swatting as a summer entertainment has about passed out for lack of time to concentrate on it.

The Felix Cobb family went to a picnic over at Hauger's grove last Sunday. They took a big dinner which they meant to eat, but which they didn't, for the reason that Felix set the basket in a cool place by a log and it got full of red ants.

Lewis Jackson got a letter the other day from his boy who is up in the city, and it said he hadn't been quite able to make expenses, and would they all chip in and send him money to buy him a new suit of clothes. And, after Lewis read it over, he said there was another chip off of the old block.

Andrew Allen went over to Albany last week as a delegate to some kind of a lodge gathering, and he was so impressed by the big parade that he marched in, that he's been trying hard to corner some of his friends and tell them all about it. But they've been sort of dodging him till it wears off of his mind a little.

Miss Mabel Young, our well known telephone operator, was visited last Sunday by one of her admirers from out of town. And he managed so often to show a twenty dollar bill he had, that she got the impression that he must have been so surprised at having it that he wanted to look every little while to see was it real.

Somebody has remarked that when you go in Will Deal's real estate office he always appears terrible busy, but when you analyze close, seems like he's mostly picking things up and laying them back down again.

Some strangers, who passed thru town Tuesday in an automobile, were terribly taken up with Tom Jackson's young bull pup which he has promised to hold until Freddie Brown can save \$2 to pay for it. And, seemed like they couldn't understand Tom's viewpoint when they offered him \$15, and he wouldn't sell on account of he'd promised to hold the pup for Freddie.

Wesley Mills was speaking recently about how when anybody gets famous they're pestered a good deal by people wanting their signature as a souvenir; and he said he had been bothered some himself by people who wanted him to sign his name, and where they always wanted it was on a note as security.

Israel Treadway's wife has been invited to spend a week or two with her sister over at Newport, the one that's reported to have married tolerably well. And, Israel would like for her to go only he's afraid that what she'd see would cause her to come back feeling a little disappointed with their own domestic outlook.

Alec Powers and the rest of the Town Board met Wednesday night to talk about building a new sidewalk on Mulberry street. And Alec told the others right at the start that he didn't want to be contrary, and if they could see it like he did, why there wouldn't be any trouble coming to an agreement.

Tom Riley's young son, Billy Boy, saw a man yesterday who was mighty near plumb bald on his head. And, right away Billy wanted to know how did the man pull out a hair to test his razor when he wanted to shave.

The Other Woman

Mrs. Margaret L. Wood, president of the Anti-Divorce league, said in a recent address in Topeka:

"If married people would only try to please one another, like single people! The whole secret of the unhappy marriage and divorce may be found in the words once spoken by a bricklayer's wife in a law court:

"Judge," said the poor woman, "when a man starts brushin' his clothes and shampooin' his head and cleanin' his teeth, his wife knows there's somethin' in the wind."—Pittsburgh Chronicle-Telegraph.

Record Height for Woman

Extremely tall women are not as common as men of unusual height. The tallest woman of whom there is authentic record was an English woman known as "Maid Marian," who was on exhibition in London about forty years ago. She measured 8 feet 2 inches.

El Morro, San Juan, Becomes a Soldiers' School

A view in the old fortress of El Morro at the entrance to San Juan harbor, Porto Rico, which has just been converted into a schoolhouse for Porto Rican members of the American army stationed there.

Canada Also Suffers From Disastrous Floods

Canada, like the Mississippi valley, has been having floods that in some regions are the worst in a quarter of a century. This photograph was taken at Brandon, Manitoba, which was entirely inundated, 18,000 persons being rendered homeless.

AMUSEMENTS

"Blind Alleys", deserves a place right at the head of Thomas Meighan's many starring vehicles. In it, Tommy takes a crack at fast melodrama; the result, as might be expected, is darned entertaining.

Owen Davis and Frank Tuttle had a lot to do with the success of "Blind Alleys." The former wrote the story and Mr. Tuttle directed. Evelyn Brent and Greta Nissen in the featured feminine leads, give Mr. Meighan capable support and the audience many heart throbs.

To relate the plot would detract from one's interest on seeing the picture but the relating of a few of the highlights will show exactly what's to be expected in "Blind Alleys." It opens with an impressive marriage ceremony in which Tom, a merchant marine captain, marries his Cuban fiancée, Miss Nissen. They journey to New York on their honeymoon and things start happening. First, the young husband is knocked unconscious by an auto in Times Square; Then Greta falls into the hands of some thugs; Tommy leaves the hospital, goes into a coma and a strange woman nurses him back to health.

And—to catch my breath—that isn't the half of it! "Blind Alleys" will remain at the Met for two days more. Paramount produced it. Emmet Crozier prepared the screen play.

PERSONALS

Mrs. Allie Clark visited relatives in Wilmington Sunday.

W. A. Teegardin and J. J. Tinkey were business visitors in Columbus today.

Mrs. W. J. Graham accompanied by Miss Avis Reid, spent the day in Columbus.

Captain W. B. Davis, of Williamsport was a business visitor in Columbus today.

Mrs. James Sines and son, Fred, of Columbus, were visitors in the city Saturday evening.

Mr. and Mrs. John Shelby and son, Jack, left Monday for a visit to relatives at Aurora, Illinois.

Mrs. Della Carter and son, Orris, left Monday for Huntington, West Virginia, to visit relatives.

Don Allen, of Columbus, spent Sunday with his father, A. E. Allen, and family of South Scioto street.

Virginia Hulse, of Jackson township, was the guest of Bonita Hulse from Thursday to Saturday of last week.

John Bowsher, of Clarksburg, was a business visitor in Columbus today.

Mr. and Mrs. Dewey Sowers spent the day in Columbus.

Miss Ruth Deitzel, of Tiffin, who has had charge of the Bible Vacation school, has finished her work and returned home Saturday.

Mrs. O. S. Harman and Mrs. C. F. Wolfley, of Belle Center, who have been guests of Mrs. Mary Krimmel and Mr. and Mrs. Fred L. Fickardt, have returned home.

Mr. and Mrs. W. E. Cady and daughter, Virginia, who have been visiting Mr. and Mrs. Scott Tipton, and family at Pataskala, returned home Sunday.

Mr. and Mrs. Arnold Hastings, of near Atlanta, and Mrs. M. E. Van-Riper, of this city, motored to Zanesville Sunday and attended the funeral of Mrs. Pansy Soward, an old friend of Mr. and Mrs. Hastings.

Mr. and Mrs. J. Wallace Crist and son, William, have returned home from a motor trip to the east. They visited New York City and came home by the way of the Hudson river and Niagara Falls route.

Mr. and Mrs. Joe B. Work and daughter, Julia Jane, left Sunday for Warren, Indiana, where they will be the guests of relatives. His father, Rev. Granville Work is in temporary charge of the church, of which he was once pastor.

Sister Mary Celestine of Leonard Town, Maryland; Mr. and Mrs. Carl Snider, of Detroit, Michigan; Mr. and Mrs. William Washburn and son, Joseph, of Chicago, Illinois, were called here by the serious illness of Edward Snider, son of Mr. and Mrs. George Snider of South Court street.

Mr. and Mrs. Gus McNaughten and Marcus R. Hawks, of Columbus, were Sunday visitors in the city.

Mrs. Harry Imler, of Cleveland, who has been the guest of her father Charles Fausnaugh and family, has returned home. She was accompanied by her sister, Miss Helen Fausnaugh.

Hardly Worth Mentioning

"What is half of one-third?" said the teacher to Ted, and the boy, unaccustomed to such vague things and obscure, said: "I don't know for sure; but it can't be so awfully much."—Boston Transcript.

WE SAY IT WITH CHECKS

If you were laid up by accident, some of your friends would send you flowers. Others would write or call to see you.

Dig Up Ruins Believed to Be Timur's Palace

Samarkand, U. S. S. R.—Remains of walls of what is believed to have been one of the palaces belonging to Timur or Tamerlane, the renowned Oriental conqueror of the Fourteenth and Fifteenth centuries, have been unearthed by excavators here. The walls appear to have been richly decorated with frescoes and other ornamentations.

"Timur the Lame," who carried his victorious arms from the Volga to the Persian gulf and from the Hellespont to the Ganges, had his capital in Samarkand, once the richest city in the Orient, and it was from there that he started on his famous expedition to conquer India. From this venture he is said to have taken back to his native city an immense quantity of spoil and 90 elephants laden with stones of a peculiar quality with which to build his palace.

**Silks and Crepes Liked for Travel****Frocks for Shipboard or for Land Excursions Smart and Serviceable.**

Quite the most engaging topic before the reviewer of fashions at the moment, writes a fashion correspondent in the New York Times, is that of traveling togs. There is no escaping them, if one wished to do so, for every shop is offering them, and every designer is picturing clothes suitable for travel in colors so seductive that one who has not planned to go abroad is tempted to rush at once and book passage. If there is no better reason there are all the costumes and accessories with which to outfit one's self and to make the excursion one of pride, thrills and comfort. This outfit is not assembled casually, for there are being offered each season so many new styles in dress for traveling that it is not merely a matter of meeting requirements but of luxuries and all sorts of pleasant things.

Doubtless there was a time when women wore almost anything for traveling, so that it was stout, weather-proof and comfortable. That was before the great change came in the type of clothes for women from the frilly and feminine to the tailored and ultra-sports, as it seemed at first to be. This is the history of all the sort of dress that is now called sports, and which is so far distant from the sensational picture at first presented that now it has become the conventional and universally approved. It is no longer necessary to go about the world, motoring, sailing or by train, wearing a nondescript or unbecoming costume. The broadening of social activities has created a demand for much else, and the creators of fashions are finding in this an opportunity to present their best work.

All sports styles are more attractive this season than they have ever been before, and the most chic, charming clothes are worn in America with which to equip one that less time may be reserved for shopping on the other side. Along with the best work of designers over here are the imported models from London and Paris—frocks, suits, ensembles, wraps and accessories with which to answer the demand.

Smart, serviceable clothes for the sea and for foreign travel are being made to suit the tastes of women of every type. This season, more than ever before, it is possible to dress suitably, comfortably and becomingly at prices most reasonable, and a woman may sail for Europe with the consciousness of being prepared to enjoy her excursion without anxiety about her wardrobe, and leave the shopping experience until the last lap, when she will have the advantage of the autumn collections from which to select her winter apparel.

Radical Changes in Fabric.
One of the radical changes that has come about in traveling dress is in fabric. A woman does not now need

Black and White Check, Trimmed With Red Flower, Belt, Buttons.

to dress as though she were to sail before the mast, provided only with flannel and homespun. A large part of the traveling frocks for land or sea are silk, especially crepe. On board ship in the summer several dresses of crepe of the heavier weave will be serviceable for morning, afternoon or evening. In the better qualities crepe has a firm texture and sufficient weight to retain its shape and to be of proper warmth for fair weather. On deck, except in midday heat, a sweater, waistcoat or jacket will be grateful, and these, as well as the raglan or other cloth wrap, slip most easily over the crepe.

Flat crepe, canton crepe, and crepe de chine are the kinds most in demand, and these are made in the greatest variety of colors and combinations both as to material and dye.

Ideal material for dress of this type, which will serve as well for comfortable, presentable travel ashore, is illustrated in a charming model de-

signed in America of the new silk. This answers admirably the need of a simple smart frock which may be worn with or without an overwrap. The crepe is plaited in a cluster at each side of a yoke having a small turnover collar and tie, with a row of small silk-covered buttons ornamenting the middle of the bodice. The plaits extend to the bottom of the frock, and a soft girde-belt of the material is fastened with small metal buckles. This girde is repeated with one small buckle as a trimming swathing the crown of the felt sports

A Modified Version of the Sailor Suit Is in Navy Kasha.

hat having a ripple brim. The sleeves are long and plain, with stitched cuffs to match the collar of ecru linen. The costume is in one of the new shades of ecru beige.

Another frock of silk is made in the smart two-piece model, a finely plaited skirt and bodice in pale yellow, with which is worn a knitted cardigan of yellow wool with a border of white wool. In a winsome little French model a straight loose bodice is attached at the hipline to the skirt, which is laid in small box plaits. It is buttoned down the front, with square patch pockets at the sides, and illustrates the latest fancy in belting the bodice at the normal waistline with a narrow strap of suede. The frock is of flat crepe in hyacinth blue and is finished all around the edge of skirt, cuffs and pockets with a band of crepe of darker blue, which is matched in the color of the belt. A topcoat accompanies this frock.

Woolen or Worsted.

Styles of dress which are important for an ocean voyage and for general wear include one made of lightweight woolen or worsted, of which there are so many variants now presented by the best designers in this country and abroad. Mohair in the new weaves is ideal for a traveling dress. A youthful slender suit is made of tan mohair. The skirt is plain at the sides with a cluster of deep knife plaits arranged directly in front. This is attached in the usual way to an underbodice of ivory crepe de chine, and the overblouse has a surplice line front, crossing to one side, where it is fastened with three buttons. A band of Havana brown and green finishes the bottom of the skirt and the cuffs and outlines the V-line of the blouse. A long tan coat of the mohair lined with crepe de chine is designed to wear over this frock.

While many of the more dressy frocks and wraps are shown in the lovely pastel shades, these are for occasional wear aboard ship. The practical models are shown in tan, beige—which is stronger than ever this season—and in gray. Gray in every shade from pale Quaker to Oxford is used by the best designers for traveling suits. In some of these another shade, even two may be introduced, and a contrasting color is used. A frock in the popular "jumper" style of medium gray kasha has a line of green about the top of the skirt hem and around the edges of collar and sleeves.

Plain Colors for Travel.

For travel wear, as in all sports dress, plain colors predominate. The variation is in colored borders, in the combination of two or three shades of a color, or of contrasting colors and in brightly tinted accessories. For service the quiet shades of brown, green, tan, beige, blue and gray are used. New names include oak crest, sawdust and leaf brown; sage, almond and fairway green; navy, slubbad and Flemish blue are shown, and a great deal of white. A few checks, stripes and mixtures are to be had, but everything in the nature of patterning is shown in the blouses and scarves. Some of the new overblouses to be worn with two-piece suits are printed in bold, vividly-colored designs, ultra-modern and cubistic in feeling.

Culotte skirts, strongly approved by Worth in his endeavor to introduce the trouser style, are liked by some women for traveling. In an uncommonly chic model received from Paris the trouser effect is somewhat concealed in the arrangement of plaits and panels, although the design makes for comfort.

HAT GAVE WARNING OF OSCAR'S TEMPER

One of the eccentricities that made the late Oscar Hammerstein, the noted theatrical impresario, such a picturesque figure on Broadway is recounted by George Blumenthal in an article in Liberty. "When you saw Oscar Hammerstein coming down the street wearing his funny silk hat, you knew he was in a good humor. But if he were wearing a slouch hat—look out!"

"I recall that at the Manhattan opera house there was a little place beneath the stage which had never been finished," the writer tells. "This 'cave' would admit about six persons and was a great place to be when Hammerstein went on one of his many rampages. We employees called it the Cave of Refuge. Before Hammerstein arrived for the day, we generally had a lookout posted. He would come back and report something like this: 'It's all right—the boss is wearing his high hat.' Or: 'Watch out—he's got on that slouch hat!' The slouch hat meant the Cave of Refuge for us."

Sower's Sure Reward

He who sows, even with tears, the precious seed of faith, hope, and love shall doubtless come again with joy, bringing his sheaves with him, because it is the very nature of that seed to yield a joyful harvest.—Cecil.

Oldtime Toast Glass

A pass-glass is a tall drinking glass marked with horizontal lines to indicate the amount to be taken in response to a toast. Such glasses were much used in Germany in the Eighteenth century.

Watch Your Woolens!

With the summer season, the moth miller is abroad hunting a good place to lay her eggs. She prefers woolens as a good place to deposit her eggs, for there will be good feeding for her young.

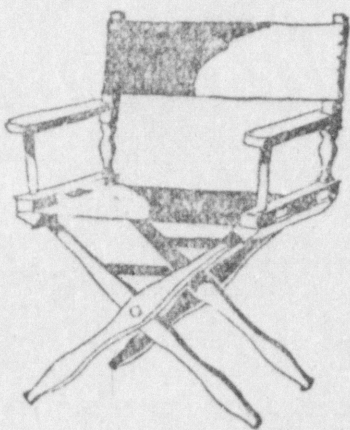

Keep the cover on your upholstered furniture, brushed at least once each week, remove all cushions, and use your electric cleaner now and then. DO NOT COVER YOUR FURNITURE WITH COVERS. The young moth will crawl thru the covering and destroy your coverings before you are aware of their presence.

Place your woolen clothing and blankets in a moth-proof chest and cease to worry. We have just received a large shipment of "Treasure Chests" lined inside with red cedar, with walnut on the outside. They are beautifully finished and will add greatly to the beauty of the room, as well as serve as a protection to your clothing.

Priced from \$16.50 up

Haven't you often wished that you had a folding chair to take with you on picnics and camping tours? We have some that are very fine for that purpose. They fold up into a small space, yet are comfortably lazy. They are very handy around the house when guests arrive, especially for use on the porch. They are strong, holding the largest persons, and yet are low priced.

They start at \$4.25

CIRCLEVILLE, OHIO

Briton Finds New Way to Get Auto Repaired
London.—A new way to get one's automobile repaired has been discovered by a London man. The formula is to leave it standing alongside another one of the same make in the hope that the owner of the other car will mistake it for his own and put it in order.
Anyway this happened at a seaside resort recently. A Londoner returned in the evening to the place where his car was parked but on getting into it he found that it wouldn't start. Thereupon he climbed out, removed and cleaned the spark plugs, tuned up the magneto and adjusted the carburetor. The car started off beautifully just as the real owner rushed up shouting, "Police." The first man then found his own car just behind the one which he had so kindly repaired.

WE PRINT THE NEWS

TERSE TRUTHS
Only a hopeless fool sneers.
Oil and truth reach the surface.
Poverty soon overtakes idleness.
Many a head is full of emptiness.
Merit often turns up in unexpected places.
It's easy to catch suckers with a line of talk.
Marriage is a gamble when there's money back of it.
He who has lost all confidence can lose nothing more.
The difference between two men is generally a woman.
The multiplication table affords the miser food for thought.
If poverty is a blessing in disguise, the disguise is perfect.
The man who looks straight ahead misses a lot on the side.

When a fool is angry he opens his mouth and shuts his eyes.
Every dreamer expects to accomplish wonders when he wakes up.
In a smoky, sooty city men buy a new hat as often as a woman does.
If one knows what he can do best at a party, he shouldn't do it too often.
Men who are seeking to fool others about their age are never quite sure they have.
A woman likes to be praised for qualities she knows she has, even if you exaggerate.
It is the people who have to do the fighting who want their rulers to be cautious about ultimatums.
Most of us wish we had just a little more egotism, but those who have plenty of it don't know it.
Trouble Is a Sprinter
The man who is willing to meet trouble half way seldom has to go that far to meet it.

HEART SECONDARY, ASSERTS DOCTOR
Cell Activity Forces Blood in System, He Says.
Berlin.—Prof. Martin Mendelsohn, who has occupied the chair of diseases of the heart in Berlin university since 1890, has put forward the extraordinary theory that the heart is not the prime power for life, but as an organ plays only a secondary part. His theory is that the activity of the cells of the body, in absorbing and eliminating fluids, constitute the chief motive power in forcing the blood through the system.
In support of his theory Doctor Mendelsohn calls attention to the fact that many persons with exceedingly weak hearts continue to live, although in these particular cases it is impossible to believe that their hearts can pump the blood through the body.
Professor Mendelsohn first propounded his theory in the new medical weekly, Die Medizinische Zeit, in a recently published article, which subsequently was taken up by Alfred Kerr of the Berliner Tageblatt. An elaborate discourse on the subject is being prepared by Doctor Mendelsohn for an early meeting of the medical society.
The author of this new theory contends that "the human body's motive power is represented by the cellular activity of the glands and skin in absorbing and excreting liquids which furnish the requisite fuel for the human motor, whereas the heart and blood circulation merely play a regulative role in distributing such fuel and resulting refuse to and from the various motors throughout the body, namely, the internal, glandular and epidermic cells."
Doctor Mendelsohn says that this explains many cases of the burial of persons apparently dead, and he argues that other tests besides cessation of the heart beat are necessary to establish true death.

The Salesman
"Well, old man, what are you doing these days?"
"Oh, I'm selling furniture."
"And what furniture have you sold?"
"Only my own, so far."—Montreal Family Herald.

Taking No Chances
When fire destroyed a Pierre (S. D.) school, one little fellow, his face agrin, ducked under his teacher's arm and tossed his books into the flames. While the fire promised him relief, he wasn't taking any chances.

English Political Term
"Minister with portfolio" is the term given to a member of the British cabinet who has jurisdiction over a special department. "Minister without portfolio" is a term given to a minister of the British cabinet who has no specific department over which he has jurisdiction.
Be Tolerant
"It is necessary to be tolerant in order to be tolerated."—Norman Macdonald.

Where All Are "Noble"
Every citizen of Montpellier, France, claims that he has the right to call himself baron. In 1587 the baron de Caravette bequeathed his title and estates to the city. Hence, it is argued, every child born in the city may adopt the title.
Her First
A book has been written about the love affairs of George Sand, the woman novelist. No doubt it starts off with Chap. 1.—El Paso Times.

"Some tobacco
but I'll bet it's expensive"

GIVE any man a pipeful of Granger without telling him its price ... let him judge it solely on taste and every time he'll say, "It must be expensive."
True enough, it is costly tobacco made by costly processes ... and if packed in the ordinary pocket tin it would be expensive ... BUT

sensibly packed in foil
it sells for just
ten cents

GRANGER ROUGH CUT

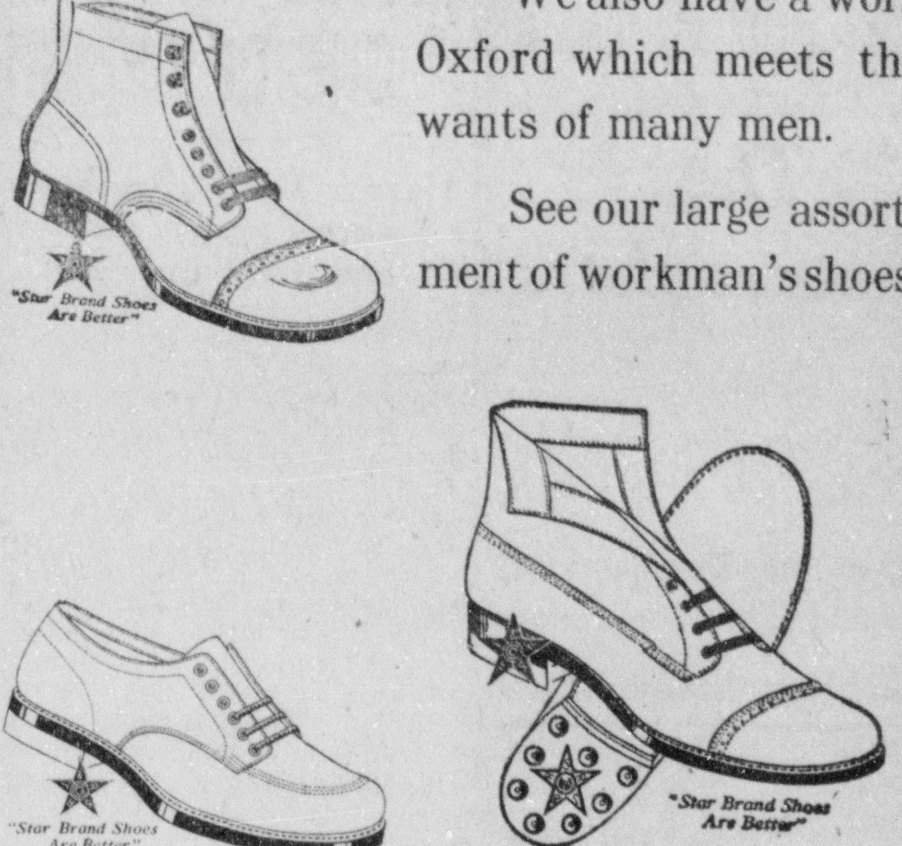

The half-pound vacuum tin is forty-five cents. The foil-pouch, sealed in glassine, is ten cents.

Liberal allowance
for your old cleaner

You won't have to postpone owning a Greater Hoover until your old, inefficient cleaner is completely useless. You can know the joy of Hoover cleaning immediately. You can have the aid of the Hoover all through these summer months, when the daily burden of blown-in dust is so great and Hoover helpfulness means so much.
Just call us on the phone. We'll make an appraisal of your old machine—without the slightest charge or obligation—and give you a generous allowance for it on the purchase of your new Hoover.
Just think what a difference having the Hoover is going to make in your enjoyment of the summer! Think of the extra time you'll have for rest—the extra vitality you'll have for play—if the Hoover is relieving you of the burden of cleaning—and doing it better than it's ever been done before.
"Positive Agitation," the revolutionary cleaning principle of the Greater Hoover, sets a new standard of home cleanliness. If you don't know the untold difference which this amazing principle makes in cleaning, you owe it to yourself to have a Hoover demonstration. Only \$6.25 down, balance monthly, if you wish to purchase.

You can now get "Positive Agitation" in a new popular-priced Hoover model. Ask us about it.

Still Falling

At school in Lankershim the other day, the teacher asked Buddy Cohen if he knew what a falling out meant. "Sure!" exclaimed Buddy. "We have one in our family right now!"

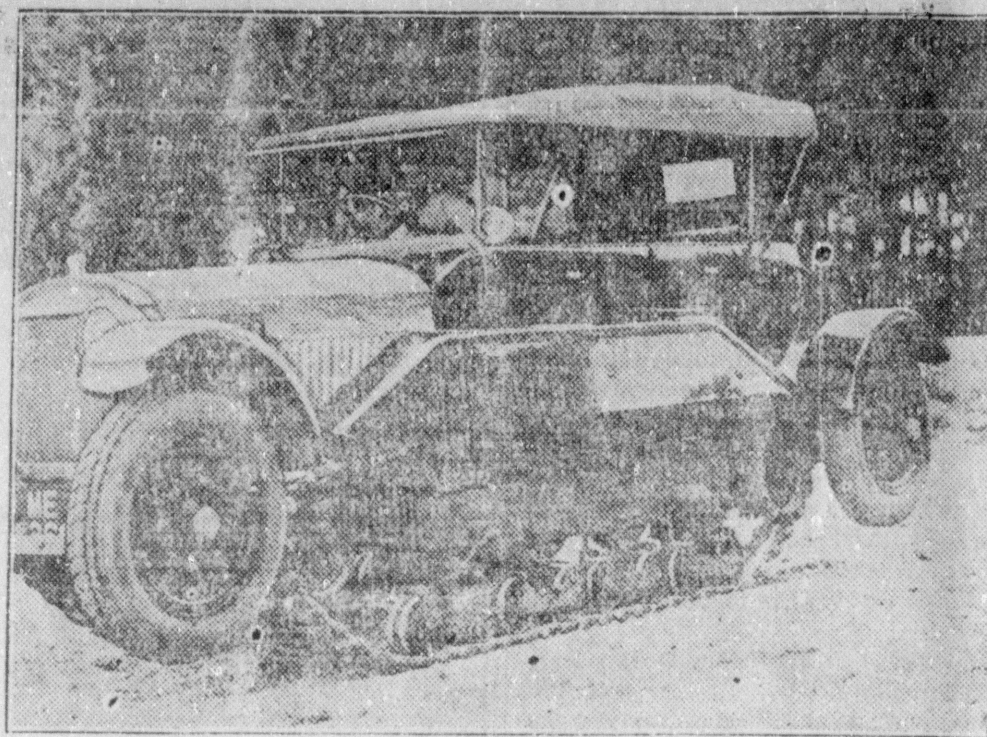

"Why, Buddy, you don't mean your father and mother are not getting along?"

"Sure they do! But daddy's getting bald!"

"Clip" Made Trouble

A cook in Rockland, Maine, shaved his head and bumped into trouble right away. Being in such close proximity to the penitentiary at Thomaston, he was arrested on suspicion of being an escaped convict. He had much difficulty in convincing the police that he had merely removed his hair to avoid getting grease into it when he was frying food.

AUTO-TRACTOR LATEST IN TRANSPORTATION

The latest vehicle for army transportation is the convertible automobile-tractor, which was demonstrated by the British war office. The experimental car, a reconnaissance, has a lengthy chassis and between the front and rear wheels is a tractor which can be lowered or raised at will, depending upon the topography of the land.

MOTOR JAUNT IS ONE OF DELIGHT

Have Car Overhauled, Brakes Properly Adjusted and Tires Inspected.

Vacations remind me of our two weeks' motor trip to Estes park last summer, and I remember how we planned what to take and what to leave at home. It's a problem. Some tourists take dogs, canaries, even victrolas. But on a camping trip, you want to forget some marks of civilization, says Aunt Aggie of the Kansas State Agricultural State college.

Perhaps the experiences we had in selecting things to take will help some would-be campers.

Things to Get.

First, get a waterproof tent—try the hose on it before you leave home to be sure it won't leak. A wall tent, or one that goes over the car, is satisfactory. Steel stakes are better than wooden.

We took a steel spring auto bed, but although it was comfortable, it was too heavy to handle. A bed with woven rope bottom and wooden supports rather than steel is better for an auto bed. Take a folding cot apiece for the rest of the family. You'll need plenty of warm comfortable—newspapers help out because they are good insulators.

We took as few clothes as possible and packed them in some old suitcases—new bags would have been ruined on that trip. We wore hiking clothes.

A short-handled spade helped us out of mud holes, and an ax was always useful. If you plan to fish, take your fishing tackle.

Cooking Utensils.

For meals, we had a small aluminum pan apiece, unbreakable cups, forks and spoons apiece, two or three case knives, a good butcher knife, a sirup pail for making coffee or heating water, a gallon pail for carrying water, salt and pepper shakers, skillet, and a large spoon for stirring. We took along a home-cured ham and saved a number of meat bolls.

One of the children kept a notebook of expenses, and immediately after we bought anything—gas, oil, food—she recorded the amount. It cost us just \$150 for six of us to take the trip, and of course we have all our camp goods left to take another jaunt.

Our expense keeper also kept a diary of the trip in her notebook and, with our snapshots, we live over again our experiences.

Before leaving, have the car thoroughly overhauled, brakes adjusted, and a good set of tires put on, with a spare. A half-gallon can of oil is enough for emergencies. If you want to, take a trailer to pack things into, but one car is much easier to manage than two, even if the one is crowded.

Car Greatest Necessity for the Wife of Farmer

The American farm housewife can get along without a lot of things, but she must have her automobile.

Running water in the kitchen, a telephone and a radio are regarded as necessities, but the motor car ranks first.

The General Federation of Women's Clubs has announced that replies to 40,000 questionnaires sent to housewives living on farms disclosed that nearly four-fifths of them have automobiles, one-fifth radio sets, more than a third have running or pumped water at kitchen sinks.

Top of Steering Gear Post Repays Lubricant

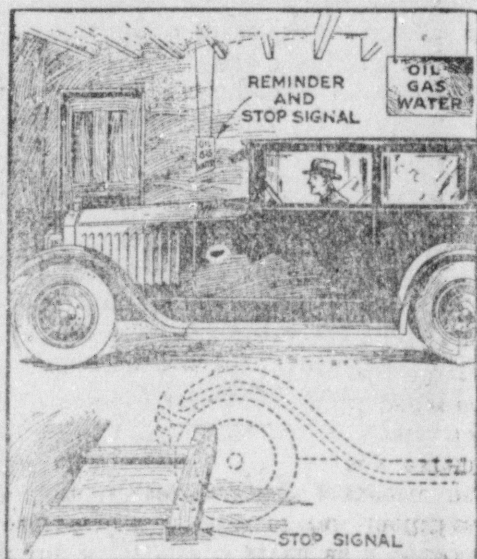

It pays to keep in mind many of the less conspicuous parts of the car which are not properly lubricated because they are overlooked so easily.

One of these, almost invariably forgotten in the lubricating process, is the top of the steering gear post. A few drops of light oil applied at this point every few thousand miles will take away the grinding noise when one tugs at the wheel as in parking.

Clutch and brake pedal shafts need a little lubricant once in a while. Neglect causes excessive wear, resulting in noisy pedal action.

Two Plans for Stopping Car in Right Position

The usual garage is just large enough to accommodate one, two or three cars, and the space in front of and behind the cars is rather limited. To prevent running the car into the garage too far, one owner suspended a card from the ceiling, so that it would just touch the windshield when

Handy Methods of Stopping a Car in the Correct Position in a Garage.

the car was in the right position. Another method of preventing the car from going too far is to provide a removable wooden bumper on the floor as shown in the lower sketch. G. A. Luers, Washington, D. C., in Popular Mechanics Magazine.

Australia Is Big Buyer of Heavy-Duty Trucks

Australia is the largest purchaser of American-made heavy-duty trucks, contrary to the public belief that Canada imports more of that type of vehicles than any other country. This is due, perhaps, to its nearness but the facts, do not bear it out.

Last year, according to the government figures, 647 trucks of more than two and a half tons capacity were imported from the United States by Australia. The agricultural development of the Antipodes is given as a reason, together with a lack of rail facilities. As a matter of fact, truck experts believe, there never will be any extensive rail development in Australia, modern highways being built between the important cities which will afford ample transportation routes for the heavy trucks that also serve the rich farming districts that lie between.

Canada imported a little more than a third of the number of heavy-duty trucks that Australia did, the total for the neighboring country being 271.

AUTOMOBILE NOTES

What the world needs now is an automobile that will carry its own parking place.

Automobile drivers are getting their brakes tested for nothing, but pedestrians are still paying to have their eyes tested.

Some of our ancestors left footprints on the sands of time, but you can't do much with a rubber tire on a concrete pavement.

A large proportion of "blowouts" of tires are due to rim cuts, and these are caused by not keeping rims free from rust and grit.

To start an engine when the ignition is locked and the key is lost, run a wire from the underground side of the horn to the ignition coil.

The average worker gets \$2,000 a year, we read in a reliable journal. Of which, we would say, the average automobile dealer always gets some thing.

One person is struck by an automobile in this country every 42 seconds, a government statistic says. Once upon a time our national sport was baseball.

While a car may seem to ride better at 40 miles an hour than at 30 over a rough road, the higher speed sacrifices longevity and efficiency of axles, wheels, wheel bearings, differential, steering rods, brakes and other important parts below the springs.

Our Millionaire Cabinet

There are at least five millionaires in the present cabinet. They are Secretary of the Treasury Mellon, Secretary of Commerce Hoover, Secretary of State Kellogg, Secretary of Labor Davis, and Secretary of the Interior Work. Their wealth rating probably corresponds to the order in which their names are given.

They Certainly Do

Examiner—The farmers raise the grain; now what do the grain merchants do?

Boy—They raise the price.—Paris Rire.

Ask Any Housewife

Pepper—What's a cockroach anyway?

Salte—Well, it's a—er—sort of marine bedbug.

IRISH MUSSOLINI IS ASSASSINATED

KEVIN O'HIGGINS LEADER AND MINISTER OF JUSTICE

Killed On Way To Mass Sunday By Personal Enemies—Was unflinching As An Officer—Was Strong Man of the Free States—Forgives Killers With Last Breath—Brought Death On Himself By His Iron Nerve.

Kevin O'Higgins, known as "the strong man" of the Irish Free States was shot down in the streets of Dublin, Ireland, Sunday, and killed by assassins.

As in the case of another "strong man," Michael Collins, his murderers lay in wait for him and as he walked alone for his home to Black Rock, a short distance from Dublin, to mid-day mass, an automobile pulled up beside him and three men pumped bullets into him.

The assassins drove away and thus far have escaped police.

As he lay on the road mortally wounded, O'Higgins, vice president of the Free State council minister of justice and foreign affairs, gasped out: "I forgive them all."

Nothing could be done to staunch the flow of blood streaming from half a dozen wounds. Four bullets had pierced his neck, one his chest and another the base of his brain.

The sorely wounded man regained consciousness and to those about him said: "I am dying at peace with my enemies. I die for my country, I go to join Michael Collins."

Mr. O'Higgins usually was accompanied by a detective, but Sunday when starting for the Bootertown Catholic church for mass, he told his escort for the first time in three years to remain at home.

He was taken entirely by surprise when attacked.

The first shot struck him in the abdomen, but he managed to stagger across the road, where he collapsed. His assailants fired five or more other bullets into his head and body before springing into their car and driving furiously away.

The first to reach the wounded minister were Eamon Fleming, an official of the ministry of finance, his brother, and Professor John MacNeill, former minister of education.

Fleming raised his head, and Kevin whispered huskily: "They've got me, just as they got my father," and later "I forgive them. I die at peace with my enemies and my God."

Turning to Professor MacNeill, he said: "There is no hope. I want to dictate my will."

MacNeill knelt on the blood stained footpath and in a clear voice O'Higgins dictated his will, leaving everything he possessed to his wife and baby daughter.

The best surgeons in Dublin were summoned to his home, where he was taken, but they could do nothing to save his life. Despite his terrible wounds, his mind remained clear to

the end, and the doctors marveled at his vitality. He embraced his wife and child, and said farewell to scores of friends.

"Kevin, while there's life, there's hope," one of them said encouragingly.

"Ah! There is no hope," the minister declared in his old cynical manner. "But I was always a bit of a diehard."

Kevin O'Higgins was known as the Irish Mussolini because of the strong measures he adopted for suppressing the Republican attempt to smash the free state for force of arms.

He was probably the most respected and at the same time the most hated man in Ireland. A nephew of Governor Tim Healy, he shared the governor's gift of incisive and bitter speech.

A particularly touching coincidence is that his assassination follows upon the similar fate of his father, Dr. O'Higgins, who was shot dead by armed riders in his own home in 1923.

DESERVED PROMOTION.

John S. Morris, of East Franklin street, and in the employ of the Norfolk and Western railroad, has been made car foreman of the company at Winston-Salem, North Carolina, and will move, with his family to that city. While the many friends here of Mr. Morris and his family regret the fact that they are leaving Circleville, yet they are pleased to know that he has received the recognition he merits and their best wishes follow them in their new home.

WROTE BEST ESSAY

Miss Rose Gertrude Schmidt of Moorestown, N. J., whose essay entitled the "Meat Parade" won for her a university scholarship and \$150 in cash as national champion of the fourth national meat story contest which has just come to a close in high schools of the United States. Announcement of the winners was made by the National Live Stock and Meat Board, sponsor of the contest, after selections had been made by a committee of prominent home economics women. Nearly 14,000 girls competed in the contest.

EASTERN STAR PICNIC.

The O. E. S. will hold a picnic on Mrs. Patton's lawn July 12, between 6 and 7 o'clock. All Stars and their families are requested to attend and bring sandwiches sufficient for their own family and one buffet dish and also dishes and silver for each member of the family.

All-Powerful Custom

Custom is a powerful weapon of ridicule. A man who eats four meals a day has as much right to that number as the man who eats three—yet the world laughs at him.—Exchange.

Self-Denial

Teach self-denial, and make its practice pleasurable, and you create for the world a destiny more sublime than ever issued from the brain of the wildest dreamer.—Sir Walter Scott.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Bucyrus—John E. Hopley, 77, formerly in the U. S. consular service and prominent in Ohio political circles a quarter century ago, died at his home Sunday. Funeral services Wednesday afternoon.

Hamilton—Cracked walls at the office of the Indiana Refining company branch here today gave evidence of the force of an explosion which robbers tried in vain to open a safe containing more than \$200. Neighbors who heard the traffic blast investigated but the bandits fled while the investigators dressed. Concrete two feet thick in which the safe was imbedded was blown away. Windows were shattered and frames loosened.

Toledo—The \$20,000 races, a trotting and a pacing event, were on this week's program for the initial meeting of the grand circuit harness racing season, opening today. The class 8 Page Dairy pace on Tuesday will carry prices of \$20,000 and the class 10 hotel trot on Thursday will be worth a like amount.

Cleveland—The hunt for Cleveland's "smoked" robber widened Monday to all of northern Ohio.

Oxford—Shortly after he arrived at his laboratory yesterday Dr. Bruce Fink, professor of botany at Miami university was found dead in his chair by his assistant. Physicians pronounced death due to heart disease.

Pomeroy—Altho slide rock still was falling today, W. McCrossa, city engineer, said he believed the landslide along the Ohio river between here and Middleport was ended. The slide started Friday and forced motorists to detour from state highway route No. 7, which was closed pending arrival today of state highway officials.

Raising a Doubt

Why are we always demanding that people get out of a rut they are in? When a locomotive jumps the track and kills a lot of people it gets out of its rut.—Atchison Globe.

Tip to Hosts

You can make any man feel at home by starting an argument.—Rutland Herald.

ASHLAND, KY. PEOPLE MEET WITH ACCIDENT

Sunday Afternoon at Crooked Bridge, Columbus Pike ---Girl Injured.

Returning home from a visit to relatives at Marion Sunday afternoon Emory Smith, of Ashland, Kentucky, driving a Ford sedan, was side swiped on the Crooked bridge north of South Bloomfield by a Ford coupe bearing license No. 954539 going north. The two cars met on the bridge which as its name implies is in a crooked line of the road and crosses the Bulen ditch at this point.

The car of Mr. Smith turned over several times and it was a wonder no one in the car was killed as the top of the machine was crushed. With Mr. Smith were his wife, Orville Gard, a nephew and Emmadelle Berry, a niece. They were brought to this city and were taken to the home of Judge I. N. Abernethy, by Mr. and Mrs. L. F. BeVier, of Columbus, who came up just after the accident occurred. Miss Mary BeVier stopped her machine within a few feet of the two wrecked machines. She had her car under control or there would have been a third wreck to chronicle.

Mr. Smith received a severe shock. His wife was bruised considerably and their little niece sustained a colosse fracture of her left wrist. Dr. Howard Jones attended to their injuries and they returned to their home in a bus. Their car was brought in by The Circleville Motors company.

Hoboes Fatten on Good Nature of Housewives

New Britain, Conn.—Any good hobo with a hard-luck story can make from \$12 to \$15 a day, in the opinion of Prof. W. B. Bailey, formerly of Yale, who lived the life of a tramp three summers and then for ten years conducted a hobo's lodging-house. "Thanks to the American housewife, the easiest thing a tramp does is to eat," he said in telling of his experiences at a Rotary club's dinner. "The only objection he has to the American housewife is that she insists on feeding him cake and pie when what he wants is a slice of meat between two pieces of bread."

Telephone's Beginning

In 1875 the first words were transmitted by telephone, but the first complete sentence was not transmitted until 1876.

Editors and Their Wives Call on the Coolidges

Several hundred members of the National Editorial association and their wives, making a trip through the Black Hills, called on President and Mrs. Coolidge at the summer White House. The President is seen above chatting and shaking hands with his guests.

E. D. OVERLY KILLS SELF WITH SHOTGUN

Remains Found Near Home of Son at Bexley Friday--Burial at Kingston.

With his head nearly torn away, the body of Ervin D. Overly, aged 78 Grove avenue, Bexley, who ended his life by shooting himself with a shotgun, Friday, was found about 75 yards from his home Saturday morning.

The aged man, who threatened Friday afternoon to take his life, because he was despondent over things in general, had placed the shotgun so that the bullet penetrated his neck under his chin when he pulled the trigger.

When he failed to come home a search was made for him and his body was found in a wooded section not far from the family residence, where he made his home with his son Wood N. Overly. It is believed he had hidden away the shotgun in the vicinity where he committed the act, as it had been missing from the house for several days.

Mr. Overly, who was a retired plasterer and brick mason, had resided in Columbus for a number of years, but lived in Kingston and near that place prior to moving to Columbus. He was born near Kingston, the son of pioneer residents in that neighborhood. Overly Chapel, Ohio, was named for his grandfather.

Surviving him besides his son Wood with whom he resided, and who discovered his body Saturday morning, are his wife; three other sons, William, of Bidwell, Ohio, Charles D. of Cedarhurst and Otis Overly of Vinton, Ohio; four daughters, Mrs. Lydia Neal, of 2162 Margaret avenue, Sheppard, with whom the wife of the deceased resided, Mrs. Catherine Worth, of Wellston; Mrs. Laura Romer and Miss Bessie Overly of Columbus; two sisters and a number of grandchildren and great-grandchildren.

Funeral services at 9 o'clock Tuesday from Edward E. Fisher Co., chapel. Burial in Kingston.

CHURCH PICNIC.

More than seventy members and friends of the Church of the Brethren picnicked in May's woods last Saturday afternoon.

The principal thing on such occasions is the "eats," and that was good, better, best to the nth. degree. But that was not all for the recreation feature was equally grand. Then came the musical program which made the stately old shade trees fairly clap their hands with joy in concert with the happy voices of childhood roseate youth and old age.

The cornet solos of Charles Essick, superintendent of the Sunday school and recreations and readings by others were highly complimented.

Some took pictures, others posed while the same or others took a hike, but all went merry as a marriage bell.

HIS BRITISH CROSS

This is the British Air Force cross which was presented to Colonel Lindbergh by King George in London.

SOCIAL CALENDAR

Mr. and Mrs. Frank Neff, of Pheroson entertained to dinner Sunday. Covers were laid for Mr. and Mrs. O. P. Bentley, of this city, Mr. and Mrs. George Neff of Lancaster and Edgar Ebert of Columbus.

American Flag in England

In 1918 the United States flag was formally placed in St. Paul's cathedral in London, England. It was presented by a party of American soldiers serving in the Canadian army during the World war.

Black Flowers Unknown

There are no black flowers, but the ones nearest to black are very dark tulips which are called black. There are very dark pansies also that seem almost black.

Wall Street Invests In Ultra-Violet Rays

Anton Schutz' etching of new Equitable Trust Company Building, first American skyscraper to utilize new glass for admitting sun's vital rays indoors.

IF ULTRA-VIOLET rays can produce more prosperous bankers and fairer stenographers, the thousand or more executives and employees of the Equitable Trust Company bid fair to become the envy of New York's financial district.

When they move into quarters in the company's new building, already towering above the familiar landmarks of Broad and Wall Streets, they will be working daily in an atmosphere that differs from that of neighboring offices by the presence of the vital rays of sunlight.

In his announcement, Lyman Rhoads, vice-president, states that, as a definite move to maintain the most healthful conditions for its personnel, the company will use vitaglass in the windows of eighteenth floors of the building.

"We are told that our installation is the first instance in this country where a skyscraper office building will utilize the scientifically-established health benefit of the sun's vital rays," says Mr. Rhoads, "al-

though prominent London bankers are said to have been profiting from similar installations for some time.

"We know that office workers do not have enough opportunity to get out under the sun. We know that the most valuable part of the sun is excluded by ordinary window glass. Through this discovery by an English scientist, our company plans to bring the healthful ultra-violet rays of outdoor sunshine indoors for maintaining the physical welfare of our staff while they work.

"If the exigencies of business rob its men and women of natural physical advantages and if science perfects means for returning the stolen goods, it seems to us to be the duty of business to admit the theft and to make amends by accepting the contributions of science.

"If we were to view this move solely as an investment, on which we might expect a profitable return, we are confident that the vitaglassed windows of our new building would give us that return in a newly invigorated personnel and a lessened absentee list."

GOVERNMENT COSTS PEOPLE
11 BILLION DOLLARS YEARLY

Figures Represent the Aggregate Expenditures of Federal, State and Local Governments.

Washington.—The total cost of government in the United States for the fiscal year 1925 was \$11,124,000,000, compared to \$10,933,000,000 for 1924 and \$2,919,000,000 for 1913, according to the national industrial conference board, as announced recently. These figures are the aggregate expenditures of federal, state and local governments, and include capital outlays and debt requirements.

The increase over 1924 was despite a \$365,000,000 decrease in the federal government's disbursements. Federal expenses increased again in 1926, however.

"Although the federal government in 1925 succeeded in checking the rising tendency of its expenditures through a consistent policy of economy and judicious debt retirement there is little hope that departmental expenses can be much further reduced owing to the increasing demand for necessary public service of all kinds," said Magnus W. Alexander, president of the conference board. "State and local governments have generally followed exactly the opposite policy, spending more and more from year to year and borrowing whatever they needed to make up the discrepancy between tax collections and expenditures."

Local agencies in 1925 expended \$5,829,000,000, according to the board's figures, as against \$5,421,000,000 in 1924 and \$5,136,000,000 in 1923. State governments spent \$1,539,000,000 in 1925, \$1,441,000,000 in 1924 and \$1,244,000,000 in 1923. Federal expenditures for the fiscal year 1925 were \$3,765,000,000; for the two preceding years, \$4,121,000,000 and \$3,885,000,000. In 1926 they increased to \$3,936,000,000.

The increase in population has been more rapid than that of expenditures, however, so the per capita cost of government decreased slightly in 1925. The per capita expenditures in 1925, according to the board's computation, were \$96.14; for 1924, \$96.58; for 1923, \$91.90; for 1913, \$30.24.

Future Generations

Planting and raising trees for future generations are one of the activities of electric power companies of which few people hear. A single company in northern New York state planted 4,000,000 trees between 1914 and 1926 and expects to make the total 10,000,000 by 1930.

Million Miles Flown for
Each Fatality in U. S.

Newark, N. J.—One can now fly more than 1,000,000 miles to the risk of a single fatality. This is the present situation in this country as established by the air-mail service and which is welcomed by those interested in commercial aviation enterprises. In the army and navy the distance flown to a fatality is about one-half this rate due to the greater inherent hazard called for by military requirements.

Hazards in commercial flying are rapidly diminishing in proportion to the distance traveled, as the area of operations expands. This is the preliminary conclusion of Dr. Frederick L. Hoffman, consulting statistician, Prudential Insurance company, who has for several years been investigating the situation. Doctor Hoffman last year made 14 flights himself, covering more than 2,500 miles of air distance. He is most enthusiastic in his anticipation for the future of flying, believing that in a few years flying will be as common on this side of the Atlantic as it is in Europe at the present time.

Doctor Hoffman is also of the opinion that recent legislation providing for the federal supervision of flying tends strongly in the direction of greater safety by providing for thorough inspection of all aircraft and periodical examination of pilots.

War Hero With Many
Medals Asks for Job

Los Angeles, Calif.—An appeal to City Engineer Shaw to find in his department a position for Louis Van Iersel, said to have received more decorations than any man who served in the World War, was made by Dr. A. D. Houghton of the state committee of the hospital department, American Legion. Iersel, whose health was undermined during the war, formerly worked in the city survey department of the engineer's office.

Iersel has received medals from the king of England for life-saving at sea; the French Croix de Guerre for rescuing 16 wounded comrades; a second Croix de Guerre for capturing 65 Germans, five of them officers, during the battle of the Argonne; the Congressional Medal of Honor and the Medaille Militaire; the Italian War Cross; the War Cross of Montenegro, and life memberships in the American Legion and the Disabled Veterans of the World War. He also received the "Hero" medal of the Breakfast club recently.

A Thought for Today

Fortune is ever seen accompanying industry.—Goldsmith.

DEAN VIVIAN
DEFINES ACT
OF FARMING

This is the Only Industry in Which All the Family Live at the Plant.

Members of the French Academy, once decided to define "lobster." Having reached a conclusion, it was submitted to Cuvier, greatest of French naturalists for his approval. This is what they wrote, "A lobster is a red fish that swims backwards."

Cuvier replied; Gentlemen, your definition is admirable, with certain exceptions: The lobster is not a fish, it is not red and it does not swim backwards."

This is illustrative of the fact that it is no simple matter to give a definition which will bear expert analysis. Would you care, for instance, to submit a definition of "farming?" The question was submitted to Dean Alfred Vivian, of the Ohio State University, College of Agriculture. He is amply fortified to define the term. This is the definition he gave. It transcends dictionaries and agricultural journals.

"Farming is; first, a manufacturing business," he said; second, an art based on broad applications of all the natural sciences, of economics and sociology, and third, a mode of life."

"From a purely business angle, farming is a manufacturing activity, for the farmer, working in cooperation with nature, takes a few gases from the air, some minerals from the soil, and by a synthetic process manufactures them into complex products.

"It is easily demonstrated that all of the natural sciences; biology, physics, chemistry and the rest, have a bearing upon farming. Economics and sociology touch definitely upon farming, for the farmer has his own business to run and his own social contacts to maintain.

"As a mode of life, it is distinct. In America, at any rate, farming is peculiar in this one respect; it is the only industry in which the family lives right at the industrial plant. Farming, furthermore, is the only industry in which the whole family has a part."

And this is farming, according to the highest authority in Ohio.
George U. Marvin.

DO YOUR OWN THINKING.

For fifteen years, old Tom Smith had been running the pumping engine at Brown's Falls. For fifteen years, old Tom climbed up twelve feet on a ladder every day to squirt oil in a little hole in a valve-motion rock-shaft.

One day he slipped and nearly fell. The superintendent saw it, investigated and said; "What were you doing up there?"

"Shot a little oil into that hole up there."

"What hole?" returned the superintendent. Tom showed him.

"Why, man!" exclaimed the superintendent, "that's no oil hole; that's only a lathe center—what they turned the shaft on when they made it."

So it was. We all know how old Tom felt when he found out that the hole he had faithfully oiled so long was only a blind alley. That's the difference between men—some use their brains and some don't.

Did it ever occur to you that the man who needs much supervision pays for it? He certainly does. He pays the difference between what he might be getting and what he is getting for his work. The more you know and the more thinking you can do for your work, the more you are eventually going to be paid. Then, too, the more you know and the more thinking you can do for the boss, the sooner will he put you where you can supervise the work of others and be paid accordingly. Do your own thinking.

Cause for Exasperation

"What exasperates me more than anything else about the boobies who differ with and from me on politics, religion, the money question, the tariff, weather omens and the gulf toward which we are rapidly and inevitably drifting," said J. Fuller Gloom, the human hyena, "is that they are so infernally proud of their own idocy."—Kansas City Times.

Forest Fires in France

France has little forest land, and the serious losses last year from forest fires have created great concern. During the year there were 130 serious fires and the burned areas aggregated sixty square miles. The monetary loss is estimated at 16,000,000 francs.

Old English Institution

Waits in the Middle Ages in England were a body of musicians kept by some great persons to announce the hours of the night. Many cities and towns also had their regular waits. After a time the name was transferred to persons who walked the streets about Christmas time singing Christmas hymns and carols.

FARMS FOR SALE.

74½ acre tract, fair improvements and location, \$5700.

150 acres, good two story brick dwelling and other improvements, close to school and market on a good pike.

POISONED DOG.

Somebody poisoned my dog today, Tho he never did anyone ill; And so he is thru with his canine play And his waggly tail is still. No more shall I walk in the field with him Along at my side to jag, And—I don't care if my eyes are dim Somebody poisoned my dog.

He was homely, I know, as a dog could be,

And only a mongrel, too; But I loved the old fellow and he loved me

As people and dogs may do. Nothing on earth could disturb his trust,

Or his love and faith befog, And now he lies here at my feet in the dust—

Somebody poisoned my dog.

He crawled to my side and licked my hand,

And then with a gasp he died; And—tho some people can't understand—

I patted his head—and cried,

For it isn't funny to lose a friend

From off this earthly cog,

And he was loyal unto the end—

Somebody poisoned my dog.

I wonder how any one could have done

This poor little fellow harm;

But here he lies—his race is run—

Tho his body's still soft and warm.

My life is lived on a peaceful plan,

My pace is a quiet jog,

But—I wish I could find the snake of a man

Who poisoned my little dog.

Historic Conference

The congress of Berlin was a conference of the European powers held in Berlin in 1878 at the conclusion of the Russo-Turkish war, and it concluded with the treaty of Berlin, which settled the affairs of Europe for a time. These conditions were changed by the treaty of Versailles in 1919, ending the World war.

Old Jewish Coinage

The gold talent of the Jews in ancient times was equal to 10,000 shekels; the silver talent to 3,000 shekels. The Jews did not possess coined money until after the Captivity, and the earliest allusions are to the coins of Persia.

Noiseless Screen Doors

The constant banging of a screen door in summer is unpleasant, and it is very hard on the door. It can be prevented by fastening one-inch pieces of felt or very thin pieces of cork on the part of the door-frame where the door strikes. They may be nailed on, but are best glued, and when glued will remain in place a long time. There should be one piece near the top of the door and another near the bottom.

This applies also to any other door and to cupboard or bookcase doors.

Took Name From Goddess

The term "cereal" is derived from Ceres, the goddess of Agriculture.

S A L E

As I am moving into smaller property and have an excess of household goods consisting of rugs, extension table and chairs, kitchen cabinet rockers, porch furniture and other numerous articles, I will offer same at public auction Saturday, July 16, at 2 o'clock at the Dresbach residence, 464 East Main street, Circleville, Ohio.

CIRCLE CITY DAIRY

FOLKSBURG ITEMS

The hot weather has sort of sapped us of our vitality this past week and left us contented not to disturb things much. And, maybe some of the readers know the feeling, like as for instance, you half way make up your mind to fix a screen door that won't stay shut, and then you remember you'd have to walk out thru the sun to the woodshed for a hammer, and you just let it go.

But, outside of ourselves, things in Folksburg are stirring along right lively. And, somebody just remarked that there's not much sale for the fly swatters any more, on account of fly swatting as a summer entertainment has about passed out for lack of time to concentrate on it.

The Felix Cobb family went to a picnic over at Hauger's grove last Sunday. They took a big dinner which they meant to eat, but which they didn't, for the reason that Felix set the basket in a cool place by a log and it got full of red ants.

Lewis Jackson got a letter the other day from his boy who is up in the city, and it said he hadn't been quite able to make expenses, and would they all chip in and send him money to buy him a new suit of clothes. And, after Lewis read it over, he said there was another chip off of the old block.

Andrew Allen went over to Albany last week as a delegate to some kind of a lodge gathering, and he was so impressed by the big parade that he marched in, that he's been trying hard to corner some of the dollars and tell them all about it. But they've been sort of dodging him till it wears off of his mind a little.

Miss Mabel Young, our well known telephone operator, was visited last Sunday by one of her admirers from out of town. And he managed so often to show a twenty dollar bill he had, that she got the impression that he must have been so surprised at having it that he wanted to look every little while to see was it real.

Somebody has remarked that when you go in Will Deal's real estate office he always appears terrible busy, but when you analyze close, seems like he's mostly picking things up and laying them back down again.

Some strangers, who passed thru town Tuesday in an automobile, were terribly taken up with Tom Jackson's young bull pup which he has promised to hold until Freddie Brown can save \$2 to pay for it. And, seemed like they couldn't understand Tom's viewpoint when they offered him \$15, and he wouldn't sell on account of he'd promised to hold the pup for Freddie.

Wesley Mills was speaking recently about how when anybody gets famous they're pestered a good deal by people wanting their signature as a souvenir; and he said he had been bothered some himself by people who wanted him to sign his name, and where they always wanted it was on a note as security.

Israel Treadway's wife has been invited to spend a week or two with her sister over at Newport, the one that's reported to have married tolerably well. And, Israel would like for her to go only he's afraid that what she'd see would cause her to come back feeling a little disappointed with their own domestic outlook.

Alec Powers and the rest of the Town Board met Wednesday night to talk about building a new sidewalk on Mulberry street. And Alec told the others right at the start that he didn't want to be contrary, and if they could see it like he did, why there wouldn't be any trouble coming to an agreement.

Tom Riley's young son, Billy Boy, saw a man yesterday who was mighty near plumb bald on his head. And, right away Billy wanted to know how did the man pull out a hair to test his razor when he wanted to shave.

The Other Woman

Mrs. Margaret L. Wood, president of the Anti-Divorce league, said in a recent address in Topeka:

"If married people would only try to please one another, like single people! The whole secret of the unhappy marriage and divorce may be found in the words once spoken by a bricklayer's wife in a law court:

"Judge," said the poor woman, 'when a man starts brushin' his clothes and shampooin' his head and cleanin' his teeth, his wife knows there's somethin' in the wind.'"—Pittsburgh Chronicle-Telegraph.

Record Height for Woman

Extremely tall women are not as common as men of unusual height. The tallest woman of whom there is authentic record was an English woman known as "Maid Marian," who was on exhibition in London about forty years ago. She measured 8 feet 2 inches.

Canada Also Suffers From Disastrous Floods

Canada, like the Mississippi valley, has been having floods that in some regions are the worst in a quarter of a century. This photograph was taken at Brandon, Manitoba, which was entirely inundated, 18,000 persons being rendered homeless.

AMUSEMENTS

"Blind Alleys", deserves a place right at the head of Thomas Meighan's many starring vehicles. In it, Tommy takes a crack at fast melodrama; the result, as might be expected, is darned entertaining.

Owen Davis and Frank Tuttle had a lot to do with the success of "Blind Alleys." The former wrote the story and Mr. Tuttle directed. Evelyn Brent and Greta Nissen in the featured feminine leads, give Mr. Meighan capable support and the audience many heart throbs.

To relate the plot would detract from one's interest on seeing the picture but the relating of a few of the highlights will show exactly what's to be expected in "Blind Alleys." It opens with an impressive marriage ceremony in which Tom, a merchant marine captain, marries his Cuban fiancée, Miss Nissen. They journey to New York on their honeymoon and things start happening. First, the young husband is knocked unconscious by an auto in Times Square; Then Greta falls into the hands of some thugs; Tommy leaves the hospital, goes into a coma and a strange woman nurses him back to health.

And—to catch my breath—that isn't the half of it! "Blind Alleys" will remain at the Met for two days more. Paramount produced it. Emmet Crozier prepared the screen play.

PERSONALS

Mrs. Allie Clark visited relatives in Wilmington Sunday.

W. A. Teegardin and J. J. Tinkey were business visitors in Columbus today.

Mrs. W. J. Graham accompanied by Miss Avis Reid, spent the day in Columbus.

Captain W. B. Davis, of Williamsport was a business visitor in Columbus today.

Mrs. James Sines and son, Fred, of Columbus, were visitors in the city Saturday evening.

Mr. and Mrs. John Shelby and son, Jack, left Monday for a visit to relatives at Aurora, Illinois.

Mrs. Della Carter and son, Orris, left Monday for Huntington, West Virginia, to visit relatives.

Don Allen, of Columbus, spent Sunday with his father, A. E. Allen, and family of South Scioto street.

Virginia Hulse, of Jackson township, was the guest of Bonita Hulse from Thursday to Saturday of last week.

John Bowsher, of Clarksburg, was a business visitor in Columbus today.

Mr. and Mrs. Dewey Sowers spent the day in Columbus.

Miss Ruth Deitzel, of Tiffin, who has had charge of the Bible Vacation school, has finished her work and returned home Saturday.

Mrs. O. S. Harman and Mrs. C. F. Wolfley, of Belle Center, who have been guests of Mrs. Mary Krimmel and Mr. and Mrs. Fred L. Fickardt, have returned home.

Mr. and Mrs. W. B. Cady and daughter, Virginia, who have been visiting Mr. and Mrs. Scott Tipton, and family at Pataskala, returned home Sunday.

Mr. and Mrs. Arnold Hastings, of near Atlanta, and Mrs. M. E. Van Riper, of this city, motored to Zanesville Sunday and attended the funeral of Mrs. Pansy Soward, an old friend of Mr. and Mrs. Hastings.

Mr. and Mrs. J. Wallace Crist and son, William, have returned home from a motor trip to the east. They visited New York City and came home by the way of the Hudson river and Niagara Falls route.

Mr. and Mrs. Joe B. Work and daughter, Julia Jane, left Sunday for Warren, Indiana, where they will be the guests of relatives. His father, Rev. Granville Work is in temporary charge of the church, of which he was once pastor.

Sister Mary Celestine of Leonard Town, Maryland; Mr. and Mrs. Carl Snider, of Detroit, Michigan; Mr. and Mrs. William Washburn and son, Joseph, of Chicago, Illinois, were called here by the serious illness of Edward Snider, son of Mr. and Mrs. George Snider of South Court street.

Mr. and Mrs. Gus McNaughten and Marcus R. Hawks, of Columbus, were Sunday visitors in the city.

Mrs. Harry Imler, of Cleveland, who has been the guest of her father Charles Fausnaugh and family, has returned home. She was accompanied by her sister, Miss Helen Fausnaugh.

Hardly Worth Mentioning

"What is half of one-third?" said the teacher to Ted, and the boy, unaccustomed to such vague things and obscure, said: "I don't know for sure; but it can't be so awfully much."—Boston Transcript.

Still Telling

At school in Lankenshim the other day, the teacher asked Buddy Cohen if he knew what a falling out meant.

"Sure!" exclaimed Buddy. "we have one in our family right now!"

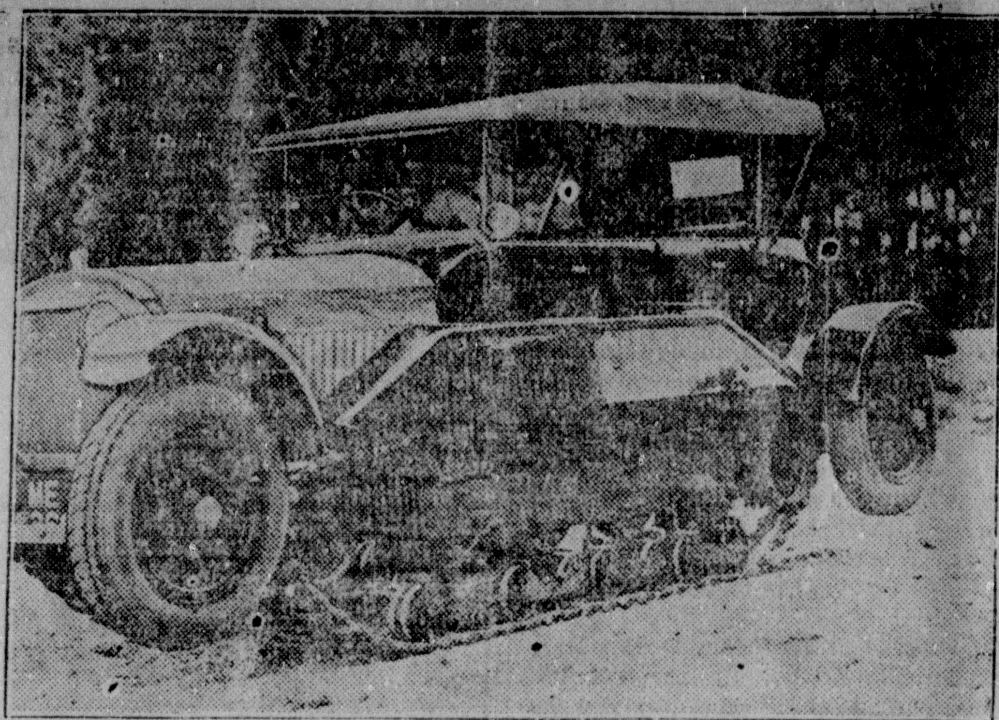

"Why, Buddy, you don't mean your father and mother are not getting along?"

"Sure they do! But daddy's getting bald!"

"Clip" Made Trouble

A cook in Rockland, Maine, shaved his head and bumped into trouble right away. Being in such close proximity to the penitentiary at Thomaston, he was arrested on suspicion of being an escaped convict. He had much difficulty in convincing the police that he had merely removed his hair to avoid getting grease into it when he was frying food.

AUTO-TRACTOR LATEST IN TRANSPORTATION

The latest vehicle for army transportation is the convertible automobile-tractor, which was demonstrated by the British war office. The experimental car, a reconnaissance, has a lengthy chassis and between the front and rear wheels is a tractor which can be lowered or raised at will, depending upon the topography of the land.

MOTOR JAUNT IS ONE OF DELIGHT

Have Car Overhauled, Brakes Properly Adjusted and Tires Inspected.

Vacations remind me of our two weeks' motor trip to Estes park last summer, and I remember how we planned what to take and what to leave at home. It's a problem. Some tourists take dogs, canaries, even victrolas. But on a camping trip, you want to forget some marks of civilization, says Aunt Aggie of the Kansas State Agricultural State college.

Perhaps the experiences we had in selecting things to take will help some would-be campers.

Things to Get.

First, get a waterproof tent—try the hose on it before you leave home to be sure it won't leak. A wall tent, or one that goes over the car, is satisfactory. Steel stakes are better than wooden.

We took a steel spring auto bed, but although it was comfortable, it was too heavy to handle. A bed with woven rope bottom and wooden supports rather than steel is better for an auto bed. Take a folding cot apiece for the rest of the family. You'll need plenty of warm comfortables—newspapers help out because they are good insulators.

We took as few clothes as possible and packed them in some old suitcases—new bags would have been ruined on that trip. We wore hiking clothes.

A short-handled spade helped us out of mud holes, and an ax was always useful. If you plan to fish, take your fishing tackle.

Cooking Utensils.

For meals, we had a small aluminum pan apiece, unbreakable cups, forks and spoons apiece, two or three case knives, a good butcher knife, a sirup pail for making coffee or heating water, a gallon pail for carrying water, salt and pepper shakers, skillet, and a large spoon for stirring. We took along a home-cured ham and saved a number of meat bills.

One of the children kept a notebook of expenses, and immediately after we bought anything—gas, oil, food—she recorded the amount. It cost us just \$150 for six of us to take the trip, and of course we have all our camp goods left to take another jaunt.

Our expense keeper also kept a diary of the trip in her notebook and, with our snapshots, we live over again our experiences.

Before leaving, have the car thoroughly overhauled, brakes adjusted, and a good set of tires put on, with a spare. A half-gallon can of oil is enough for emergencies. If you want to, take a trailer to pack things into, but one car is much easier to manage than two, even if the one is crowded.

Car Greatest Necessity for the Wife of Farmer

The American farm housewife can get along without a lot of things, but she must have her automobile.

Running water in the kitchen, a telephone and a radio are regarded as necessities, but the motor car ranks first.

The General Federation of Women's Clubs has announced that replies to 40,000 questionnaires sent to housewives living on farms disclosed that nearly four-fifths of them have automobiles, one-fifth radio sets, more than a third have running or pumped water at kitchen sinks.

Top of Steering Gear

Post Repays Lubricant

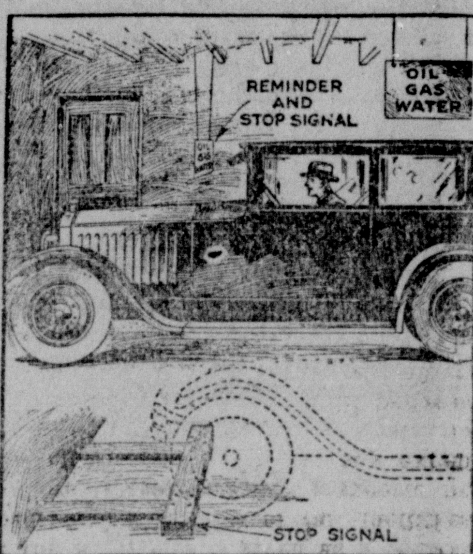

It pays to keep in mind many of the less conspicuous parts of the car which are not properly lubricated because they are overlooked so easily.

One of these, almost invariably forgotten in the lubricating process, is the top of the steering gear post. A few drops of light oil applied at this point every few thousand miles will take away the grinding noise when one tugs at the wheel as in parking.

Clutch and brake pedal shafts need a little lubricant once in a while. Neglect causes excessive wear, resulting in noisy pedal action.

Two Plans for Stopping Car in Right Position

The usual garage is just large enough to accommodate one, two or three cars, and the space in front of and behind the cars is rather limited. To prevent running the car into the garage too far, one owner suspended a card from the ceiling, so that it would just touch the windshield when

Handy Methods of Stopping a Car in the Correct Position in a Garage.

the car was in the right position. Another method of preventing the car from going too far is to provide a removable wooden bumper on the floor as shown in the lower sketch.—G. A. Luers, Washington, D. C., in Popular Mechanics Magazine.

Australia Is Big Buyer of Heavy-Duty Trucks

Australia is the largest purchaser of American-made heavy-duty trucks, contrary to the public belief that Canada imports more of that type of vehicles than any other country. This is due, perhaps, to its nearness but the facts, do not bear it out.

Last year, according to the government figures, 647 trucks of more than two and a half tons capacity were imported from the United States by Australia. The agricultural development of the Antipodes is given as a reason, together with a lack of rail facilities. As a matter of fact, truck experts believe, there never will be any extensive rail development in Australia, modern highways being built between the important cities which will afford ample transportation routes for the heavy trucks that also serve the rich farming districts that lie between.

Canada imported a little more than a third of the number of heavy-duty trucks that Australia did, the total for the neighboring country being 271.

AUTOMOBILE NOTES

What the world needs now is an automobile that will carry its own parking place.

Automobile drivers are getting their brakes tested for nothing, but pedestrians are still paying to have their eyes tested.

Some of our ancestors left footprints on the sands of time, but you can't do much with a rubber tire on a concrete pavement.

A large proportion of "blowouts" of tires are due to rim cuts, and these are caused by not keeping rims free from rust and grit.

To start an engine when the ignition is locked and the key is lost, run a wire from the underground side of the horn to the ignition coil.

The average worker gets \$2,000 a year, we read in a reliable Journal of which, we would say, the average automobile dealer always gets some thing.

One person is struck by an automobile in this country every 42 seconds, a government statistic says. Once upon a time our national sport was baseball.

While a car may seem to ride better at 40 miles an hour than at 30 over a rough road, the higher speed sacrifices longevity and efficiency of axles, wheels, wheel bearings, differential, steering rods, brakes and other important parts below the springs.

Our Millionaire Cabinet

There are at least five millionaires in the present cabinet. They are Secretary of the Treasury Mellon, Secretary of Commerce Hoover, Secretary of State Kellogg, Secretary of Labor Davis, and Secretary of the Interior Work. Their wealth rating probably corresponds to the order in which their names are given.

They Certainly Do

Examiner—The farmers raise the grain; now what do the grain merchants do?

Boy—They raise the price.—Paris Rire.

Ask Any Housewife

Pepper—What's a cockroach anyway?

Salte—Well, it's a—er—sort of marine bedbug.

MASONIC MEETINGS

PICKAWAY LODGE

Stated communications the first and third Wednesday evenings of each month at 7:30 o'clock.

GALE WATTS, W. M.

M. B. TROUT, Secretary.

CIRCLEVILLE CHAPTER

Stated convocations on the first Monday evening of each month at 7:30 o'clock.

VISITORS WELCOME

H. G. STEVENSON, H. P.
M. B. TROUT, Secretary.

TYRIAN COUNCIL

Stated assem'ies on the second Thursday evening month at 7:30 o'clock.

LESLIE D. MAY

Thrice Illustrious Master
R. G. COLVILLE, Recorder.

SCIOTO COMMANDERY

Stated convocations on the last Thursday evening of each month at 7:30

E. H. WARDELL, Commander.

GEORGE E. ROTH, Recorder.

NOAH MYERS

PROPRIETOR

Anyway the pessimist doesn't enrage you by looking on the bright side when you are having a good time being a martyr.

Doubtless the nicest thing about Bucharest, from a middle-aged queen's viewpoint, is the last syllable.

"The Store that Treats You Right."

SHIRTS AND SCARFS
MADE FOR EACH OTHER---
AND FOR YOU!

Collar attached shirts like these call for unusual companions in neckwear.

These ties feel at home---here and around the neck.

Cool looking---long pointed collars fit the cravat like a gear in mesh.

You are proud to leave your vest in the vestibule.

Further description of the collegiate group would be like trying to entertain the postman with a stamp collection.

The Shirts \$1.50 to \$5.00
The Ties \$1.00 to \$1.50
